Kristen Mara is a seasoned executive with over 15 years of experience in operations, service excellence, project delivery and state and federal regulation. She has a versatile business background and has worked in both corporate and start-up environments and non-profit organizations. Kristen received her undergraduate degree in Government and Public Policy from Smith College and holds a law degree from Western New England University of Law.

David Cichocki is a seasoned entrepreneur and business owner. For 20 years, David has owned and operated a successful large-scale commercial landscape management company with 30 employees and sales of \$2,000,000 per year. David holds a B.A. in Business Administration from Western New England University. He also has a background in horticulture and holds a Connecticut custom grounds license.

Brian Waibel also joins the team as a manufacturing and extraction advisor. Brian has over 20 years of experience creating nutraceutical-quality botanical extracts. He has created techniques to prepare Cannabis feedstock for supercritical carbon dioxide extraction, refinement methods of crude extract to create multiple product forms including oil and wax formats, material packaging in consumer delivery devices such as vape pens and dab pen systems including hardware sourcing, product branding, and supply chain distribution. Brian holds Sc.B. in Biomedical Engineering from Brown University and M.S. in Mechanical Engineering from the University of Minnesota.

Description of Business:

The businesses main focus will be on cannabis extraction. The resulting product of cannabis extraction is cannabis oil. This oil is rich in many compounds including CBD, THC, terpenes and flavonoids. The oil can be used in many products, such as tinctures, topicals, vape pens, and edibles among many more.

We will focus on 4 main categories.

1. Extraction of raw Hemp and Cannabis for oil to use in our own brand products, which will then be sold to licensed dispensaries, retail establishments.
2. Fee based extraction services of raw hemp or cannabis.
3. Sales of raw oil to licensed manufacturers of cannabis and hemp-based products.
4. Packaging oil products including vape pen filling, bottle filling and Private labeling for other licensed cannabis businesses.

Operations:

Location

We will be locating our business at 43 Ladd Avenue in Florence, MA. The location is approved zoning office/industrial.

The current footprint is 675 square feet including, extraction lab, office space, secured storage, loading dock in back.

Security:

Security measure will be dictated by the State of Massachusetts and City of Northampton licensing requirements.

We are not a retail business but, a b2b business. Product pickup and delivery will be via scheduled appointment only. The door to Pioneer Valley Extracts will remain locked at all times. The facility will be monitored by 24/7 Surveillance. There will be a separate secure storage area in the facility for raw and finished product. For further security detail please refer to our Standard Operating Procedure Document.

Equipment:

Equipment needed to produce products as described are as follows this equipment is currently owned by David Cichocki and Brian Waibel and will be in place at the start of operation

- Laboratory Glassware and basic lab equipment **(owned)**
- Scales and balances **(owned)**
- Mixing and blending equipment Magnetic hotplate stirrer, overhead large capacity homogenizer. **(owned)**
- 5 liter Rotary evaporator set up with chiller and vacuum pump **(owned)**
- Beckman Coulter 6r Centrifuge **(owned)**
- Forced hot air lab oven **(owned)**
- CO2 Extraction machine **(owned)**

Production Methods:

We will be using Co2 Supercritical fluid technology. This technology uses Co2 as a solvent to extract the essential oil from plant material. Co2 is a safe and effective method to perform extraction. This is the same Co2 that is used to carbonate soda. Any residual Co2 naturally evaporates from the product leaving no residual. The system is closed loop so the Co2 is recirculated in the system for use again. Co2 is classified as a non-flammable gas. Our main source of feed stock is “trim” (a by-product of processing the marijuana flower). We will purchase trim from area growers who do not perform extraction services. Or we will process their trim into oil for a fee. Our team has developed proprietary methods for processing plant material into oil. These methods have already produced high quality extracts in the California and Colorado market. We feel these methods produce a superior product and will secure market share ahead of our competitors who may be figuring extraction out for the first time.

Personnel:

We will employ an extraction technician and a lab assistant to start. The extraction technician will be experienced in botanical extraction, with formal education in biochemistry or a like field. The lab assistant will be a person who has the attitude and aptitude to learn the cannabis business. We will give preference to Northampton residents.

Financing:

The capital requirement to start an extraction only business is much less than a marijuana growing operation. Pioneer Valley Extracts is a going established business. Many of the startup expenditures associated with setting up a business have already been realized.

- The legal entity and LLC were established in 2017
- We have an established website.
- Web site set up for consumer access to online lab reports by searching the associated batch number on the product.
- UPC bar code for consumer product compliance obtained.
- Product design and label design.
- Necessary Equipment needed to operate (owned as noted in equipment section.)
- Working capital provided through PVx's current operating income operating account and funding account.
Personal funds of owners, both through current income sources and savings.
Investment and funding by USL of Bloomfield LLC (Owned by David Cichocki)

Marketing:

Mission Statement:

Our mission is to produce cannabis oil through the safest methods possible, with the least amount of processing, so that the plants natural compounds are retained in their original state.

From Plant to Product with Nothing in Between™

Product:

Differentiator:

Our focus on producing cannabis oil as close to the original plant profile will differentiate us in the market place. The cannabis plant has over 200 different compounds. It is the synergy between these compounds which creates what is known as the "entourage effect" where cannabinoids, terpenes and other chemical compounds all work together to achieve an effect that is greater than the sum of their parts. This is when the plant is at its most powerful in contributing to overall health. It is our goal to retain as many of these compounds, terpenes and flavonoids that were originally found in the plant in our oil. We will accomplish this through proven proprietary processing methods and product testing.

Quality Assurance:

We will assure quality of our product through third party testing. Each batch will be assigned a batch number. We have set up our web site so that the lab report can be accessed by simply going to www.pvxtracts.com/labreport and clicking on the batch number. The lab report will show compound and terpene profile, pesticide screening, microbiological screening, heavy metal screening, mycotoxin screening and residual solvent screening.

Competition:

The Cannabis business in Massachusetts is an emerging market. We will be pioneers in this new market. Competition will be limited by the licensing requirements of the cannabis business. Based on other states that have legalized marijuana we are expecting more demand than supply. Based on time to bring a crop from seed to market, demand

will far outweigh supply. Therefore we feel there will be plenty of opportunity for all licensed businesses.

Price:

Price will be set by the market, “supply and demand”. Extraction services will be priced per pound of material processed. Oil is priced per gram of finished oil.

Distribution:

Products will be sold directly to licensed retail and dispensary establishments and manufacturers wholesale only. Delivery by Pioneer Valley Extracts will be by unmarked vehicles by appointment only. Pickup at our location will be by appointment.

Promotion:

We will target our promotional efforts by obtaining a list of licensed dispensaries and grower only licensee’s. These establishments will be contacted through direct sales. We will promote our oil products to dispensaries for resale at wholesale prices. We will promote our extraction services to growers. Our sales approach to growers will be focused on capital investment and management of running an extraction lab vs a small cost of \$6.40 per gram for us to process for them. At \$15 /gram wholesale the cost is only 42% of product leaving 58% profit margin on trim.

Financial Plan:

Projected First Year Monthly Financial Statement:

These figures are based on 50% oil sales and 50% fee based extraction services. We will assume processing of 4 lbs. of feed stock material per day 20lbs/week (this is 22% of capacity)

Assumptions:

Since there is no basis for market prices in Massachusetts we will use national wholesale price averages of \$15 per gram of finished oil, \$275 per pound fee based processing services and \$200 per pound to purchase feed stock (trim).

The average yield for a pound (453.59 g) of material is 10% 45.35 grams finished oil.

Note full capacity is based on specified startup equipment

**HOST COMMUNITY AGREEMENT
FOR THE SITING OF A
MARIJUANA ESTABLISHMENT
IN THE CITY OF NORTHAMPTON**

This Agreement (the “Agreement”) entered into this 15th day of June, 2018 by and between the CITY NORTHAMPTON, acting by and through its Mayor, with offices at 210 Main Street, Northampton, Massachusetts 01060 (“the City”) and Pioneer Valley Extracts LLC, a duly organized Massachusetts limited liability corporation with a principal offices 351 Pleasant Street, Suite B, #143, Northampton, MA 01060 (“the Company”).

WHEREAS, the Company wishes to operate Marijuana Product Manufacturer as that term is defined in G. L. c. 94G and the regulations of the Cannabis Control Commission, 935 CMR 500 (“the Establishment”) in the City; and

WHEREAS, this Host Community Agreement shall constitute the stipulations of responsibilities between the City and the Company pursuant to G. L. c. 94G, § 3, as amended by Stat. 2017 c. 55, § 25 for the Company’s operations as a Marijuana Product Manufacturer in the City; and

NOW THEREFORE, in consideration of the provisions of this Agreement and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties agree as follows:

1. Community Impact.

The City anticipates that, as a result of the Company’s operation as a Marijuana Product Manufacturer, the City will incur additional expenses and impacts upon its road system, law enforcement, inspectional services, permitting services, administrative services and public health services, in addition to potential additional unforeseen impacts upon the City. Accordingly, in order to mitigate the direct and indirect financial impact upon the City and use of City resources, the Company agrees to annually pay a community impact fee to the City, in the amounts and under the terms provided herein (the “Annual Payments”).

2. Annual Payment.

In the event that the Company obtains a Final License, or such other license and/or approval as may be required, for the operation as a Marijuana Product Manufacturer in the City by the Massachusetts Cannabis Control Commission (the "CCC"), or such other state licensing or monitoring authority, as the case may be, and receives any and all necessary and required permits, licenses and/or approvals required by the City, and at the expiration of any final appeal period related thereto, said matter not being appealed further, which said permits, licenses, and/or approvals allow the Company to locate, occupy and operate as a Marijuana Product Manufacturer in the City (the "Opening"), then the Company agrees to provide the following Annual Payment for each year this Agreement is in effect; provided, however, that if the Company fails to secure any such other license and/or approval as may be required, or any of required municipal approvals, the Company shall reimburse the City for its legal fees associated with the negotiation of this Agreement.

- a. (3%) of gross revenue from marijuana product manufacturing, as those terms are defined in 935 CMR 500, at the Establishment.
- b. The Company shall make the Annual Payments quarterly each calendar year on the 1st of January, April, July and October beginning on the first of such dates after the \the Opening.

3. Marijuana Education and Prevention Programs.

The Company, in addition to any other payments specified herein, confirms that it shall annually voluntarily contribute to non-profit entity or entities in an amount no less than ten thousand dollars (\$10,000) for the purposes of marijuana education and prevention programs to promote safe, legal and responsible use (the "Annual Donations."). The education programs shall be held in the City. Prior to the selection of a non-profit entity program for this purpose, the Company will review their intentions with the City, acting through its Mayor, to ensure that the proposed programming is consistent with community needs. The Annual Donations shall not be considered part of the Annual Payment to the City. Documentation of the Annual Donations shall be made in accordance with the Annual Payment schedule set forth in Paragraph 2. In the event that no non-profit entity can offer the appropriate programming to the City, the contribution shall be paid to the City to hold in a restricted fund for release upon mutual and written agreement of the Company and City once an eligible non-profit program is identified.

4. Annual Filing.

Company shall notify the City when the Company commences operations pursuant to statute and regulation, at the Establishment and shall submit annual financial statements to the City on or before May 1, which shall include certification of gross sales for the previous calendar year, and all other information and corroborating documentation required to ascertain compliance with the terms of this Agreement. The Company shall provide the City with the same access to its financial records (to be treated as confidential, to the extent allowed by law) as it is required by the Commonwealth to obtain and maintain pursuant to its marijuana license for the Establishment from the CCC.

The Company shall maintain its books, financial records and any other data related to its finances and operations in accordance with standard accounting practices and any applicable regulations and guidelines promulgated by the CCC. All records shall be retained for a period of at least seven (7) years.

5. Re-Opener/Review.

In the event that the Company enters into a host community agreement for a Marijuana Product Manufacturer with another municipality in the Commonwealth of Massachusetts that contains terms that are superior to what the Company agrees to provide the City pursuant to this Agreement, then the parties shall reopen this Agreement and negotiate an amendment resulting in benefits to the City equivalent or superior to those provided to the other municipality.

6. Local Taxes.

At all times during the Term of this Agreement, property, both real and personal, owned or operated by the Company shall be treated as taxable, and all applicable real estate and personal property taxes for that property shall be paid either directly by the Company or by its landlord, and neither the Company nor its landlord shall object or otherwise challenge the taxability of such property and shall not seek a non-profit exemption from paying such taxes. Notwithstanding the foregoing, (i) if real or personal property owned, leased or operated by the Company is determined to be non-taxable or partially non-taxable, or (ii) if the value of such property is abated with the effect of reducing or eliminating the tax which would otherwise be paid if assessed at fair cash value as defined in G.L. c. 59, §38, or (iii) if the Company is determined to be entitled or subject to exemption with the effect of reducing or eliminating the tax which would otherwise be due if not so exempted, then the Company shall pay to the City an amount which when added to the taxes, if any, paid on such property, shall be equal to the taxes which would have been payable on such property at fair cash value and at the otherwise applicable tax rate, if there had been no abatement or exemption; this payment shall be in addition to the payment made by the Company under Section 2 of this Agreement.

7. Community Support and Additional Obligations.

- a. Local Vendors — To the extent permissible by law, the Company will make every effort in a legal and non-discriminatory manner to hire or contract with local businesses, suppliers, contractors, builders and vendors in the provision of goods and services called for in the construction, maintenance and continued operation of the Establishment.

- c. Educational Programs – If requested by the City, Company shall provide qualified staff to participate in City-sponsored public health education

programs, not to exceed four in any calendar year, and to work cooperatively with other City public safety departments not mentioned in the Agreement.

8. Support.

The City agrees to submit to the CCC, or such other state licensing or monitoring authority, as the case may be, certification of compliance with applicable local bylaws relating to the Company's application for a License to operate the Establishment, where such compliance has been properly demonstrated, but makes no representation or promise that it will act on any other license or permit request, including, but not limited to any Special Permit or other zoning application submitted by the Company, in any particular way other than by the City's normal and regular course of conduct, subject to the statutes, rules, regulations and guidelines governing them. The City agrees to use reasonable efforts to work with Company, if approved, to help assist the Company with their community support and employee outreach programs.

This agreement does not affect, limit, or control the authority of City boards, commissions, and departments to carry out their respective powers and duties to decide upon and to issue, or deny, applicable permits and other approvals subject to the statutes and regulations of the Commonwealth, the General and Zoning Bylaws of the City, or applicable regulations of those boards, commissions, and departments, or to enforce said statutes, Bylaws, and regulations. The City, by entering into this Agreement, is not thereby required or obligated to issue such permits and approvals as may be necessary for the Establishment to operate in the City, or to refrain from enforcement action against the Company and/or the Establishment for violation of the terms of said permits and approvals or said statutes, Bylaws, and regulations.

9. Security.

- a. Company shall maintain security at the Establishment at least in accordance with the security plan presented to the City and approved by the CCC, or such other state licensing or monitoring authority, as the case may be. In addition, the Company shall at all times comply with all applicable laws and regulations regarding the operations of the Establishment and the security thereof. Such compliance shall include, but will not be limited to: providing hours of operation; after-hours contact information and access to surveillance operations; and requiring dispensary agents to produce their Agent Registration Card to law enforcement upon request.
- b. To the extent requested by the City's Police Department, and subject to the security and architectural review requirements of the CCC, or such other state licensing or monitoring authority, as the case may be, the Company shall work with the City's Police Department in determining the placement of exterior security cameras.
- c. Company agrees to cooperate with the City's Police Department, including but not limited to periodic meetings to review operational concerns, security,

delivery schedule and procedures, cooperation in investigations, and communications with the Police Department of any suspicious activities at or in the immediate vicinity of the Establishment, and with regard to any anti-diversion procedures.

- d. Company shall promptly report the discovery of the following occurrences within the City to the City's Police within twenty-four (24) hours of the Company becoming aware of such event: diversion of marijuana; unusual discrepancies identified during inventory; theft; loss and any criminal action; unusual discrepancy in weight or inventory during transportation; any vehicle accidents, diversions, losses, or other reportable incidents that occur during transport; any suspicious act involving the sale, cultivation, distribution, processing, or production of marijuana by any person; unauthorized destruction of marijuana; any loss or unauthorized alteration of records related to marijuana, or dispensary agents; an alarm activation or other event that requires response by public safety personnel; failure of any security alarm system due to a loss of electrical power or mechanical malfunction that is expected to last longer than eight hours; and any other breach of security.

10. On-site Consumption.

The Company agrees that, even if permitted by statute or regulation, it will prohibit on-site consumption of marijuana and marijuana-infused products at the Establishment.

11. Term and Termination.

This Agreement shall take effect on the day above written, subject to the contingencies noted herein. This agreement shall continue in effect for so long as the Company operates the Establishment or any similar Marijuana Product Manufacturer within the City, or five (5) years from the date of this Agreement, whichever is earlier. At the conclusion of the term of this Agreement, the parties shall renegotiate a new Host Community Agreement in accordance with the current prevailing regulations and laws as such regulations and laws may be amended or replaced. In the event the Company no longer does business in the City or in any way loses or has its license revoked by the Commonwealth, this Agreement shall become null and void; however, the Company will be responsible for the prorated portion of the Annual Payment due as under section 2. above. The City may terminate this Agreement at any time.

12. Failure to Locate and/or Relocation.

This Agreement shall be null and void in the event that the Company shall (1) not locate a Marijuana Product Manufacturer in the City, in which case, the Company shall reimburse the City for its legal fees associated with the negotiation of this Agreement or (2) relocate the Establishment out of the City. In the case of relocation out of City, an adjustment of funds due to the City hereunder shall be calculated based upon the period of operation within the City, but in no event shall the City be responsible for the return of any funds already provided to it by the Company. If, however, the Establishment is relocated out of

the City prior to the second anniversary of the date of this Agreement, the Company shall pay the City as liquidated damages an amount equal to twenty-five thousand dollars (\$25,000) in consideration of the expenditure of resources by the City in negotiating this agreement and preparing for impacts.

13. Governing Law.

14. Amendments/Waiver.

Amendments, or waivers of any term, condition, covenant, duty or obligation contained in this Agreement may be made only by written amendment executed by duly authorized representatives of the Company and the City, prior to the effective date of the amendment.

15. Severability.

If any term or condition of the Agreement or any application thereof shall to any extent be held invalid, illegal or unenforceable by the court of competent jurisdiction, the validity, legality, and enforceability of the remaining terms and conditions of this Agreement shall not be deemed affected thereby unless one or both parties would be substantially or materially prejudiced. Further, the Company agrees it will not challenge, in any jurisdiction, the enforceability of any provision included in this Agreement; and to the extent the validity of this Agreement is challenged by the Company in a court of competent jurisdiction, the Company shall pay for all reasonable fees and costs incurred by the City in enforcing this Agreement.

16. Successors/Assigns.

This Agreement is binding upon the parties hereto, their successors, assigns and legal representatives. The Company shall not assign, sublet, or otherwise transfer its rights nor delegate its obligations under this Agreement, in whole or in part, without the prior written consent from the City, and shall not assign any of the monies payable under this Agreement, except by and with the written consent of the City and shall not assign or obligate any of the monies payable under this Agreement, except by and with the written consent of the City.

17. Headings.

The article, section, and paragraph headings in this Agreement are for convenience of reference only, and shall in no way affect, modify, define or be used in interpreting the text of this Agreement.

Compliance Plan:

Local Codes, Ordinances and Bylaws of Northampton, MA

PVx has worked closely with Office of the Mayor, City Clerk, Building and Zoning and other city officials to ensure that our facilities are properly zoned according to all local requirements and any requirements specific to the siting of adult use marijuana and/or medical marijuana establishments.

Northampton does not have any specific requirements around marijuana establishments other than the below listed zoning requirements. Attached also below is an email from the Mayor's Office confirming this understanding.

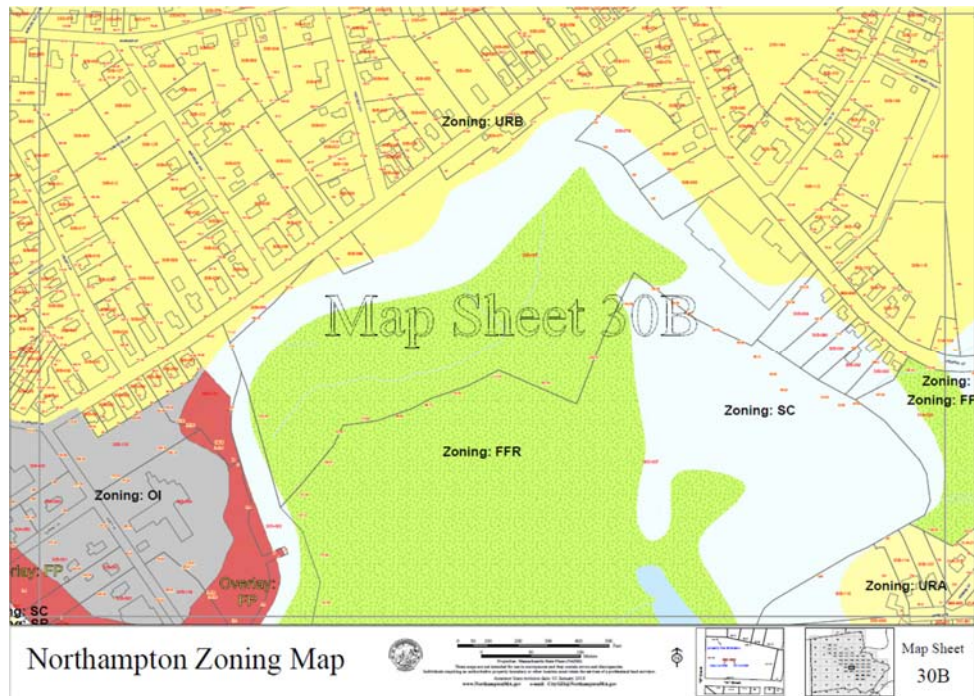

Zoning:

Pioneer Valley Extracts, LLC (PVx) facilities will be located at 43 Ladd, Avenue, Florence, MA. Florence is a village in the northwestern portion of Northampton, MA, Hampshire County and thus governed by the codes and ordinances of the City of Northampton, MA.

Per city zoning regulation in Chapter 350 S.11.6 (4), PVx facilities meet the following necessary approval criteria including:

- (b) Buildings must be well ventilated with such filters or scrubbers to ensure that there are no odors from marijuana in any place where the public or clients are present and no public exposure to any pesticides, herbicides or other chemicals.
- (c) No medical marijuana dispensary and/or treatment center shall be located within 200 ft. of any elementary school, middle school, or high school; there are no buffer limitations.

PVx facilities are located in Zoning, OI. As per Zoning Regulation, 350 Attachment 16, *City of Northampton Table of Use and Dimensional Regulation*, zone OI allows by right marijuana production (see zoning map below).

To: Kristen Mara <kristen@pvxtracts.com>;

Hi Kristen,

Thank you for your email.

We have not been asked this question in regards to local requirements, most likely because there really aren't any local requirements. The only requirement is that your location is zoned properly, along with executing the Host Community Agreement. There are documents on the [City's marijuana page](#). When you navigate to that page you will find Chapter 350 of the City of Northampton's Code of Ordinances which covers zoning. There are specific links relating to marijuana and these may be helpful in making your case of being in compliant with local codes.

Please let me know if there is anything else you need.

Thank you,
Annie

Hi Annie and Mayor Narkewicz,

We are still in the process of submitting our application to the CCC and need one last piece that I could use your advice on. We need to provide a plan to ensure we are/will be compliant with all local codes, ordinances and bylaws of Northampton.

Have you helped any other applicants with this aspect of the application? For example, I know that our location meets all of the necessary requirements (43 Ladd Ave, Florence)

and can show them the zoning map, but are there other specific regulations you can point me to that I can provide to the Commission?

Thanks for any help and direction. The application isn't always as clear as could be!

Best,
KM

7. The following is a list of all Members and their Initial Capital Contributions to the Company. Each of the Members agree to make their Capital Contributions to the Company , full and on time, according to the following terms:

Member	Contribution Description	Value of Contribution
David Cichocki		\$500.00
Kristen Mara		\$500.00

Distribution of Profits/Losses

8. Subject to the other provisions of this Agreement, the Net Profits or Losses of the Company, for both accounting and tax purposes, will be distributed between the Members in the following manner:

David Cichocki	50.00%
Kristen Mara	50.00%

9. Distributions will be made according to the following schedule: Distributions will be made monthly.

Voting

12. Each Member will be entitled to cast votes on any matter based upon the proportion of that Member's Capital Contributions in the Company.

Nature of Interest

13. A Member's interest in the Company will be considered personal property, and will at no time be considered real property.

Withdrawal of Contribution

14. No Member will withdraw any portion of their Capital Contribution without the unanimous consent of the other Members.

Liability for Contribution

15. A Member's obligation to make their required Capital Contribution can only be compromised or released with the consent of all remaining Members or as described elsewhere in this Agreement. If a Member does not make the Capital Contribution when it is due, he is obligated at the option of the remaining Members to contribute cash equal to the agreed value of the Capital Contribution. This option is in addition to and not in lieu of any others rights, including the right to specific performance that the Company may have against the Member.

Additional Contributions

16. Capital Contributions may be amended from time to time, according to the requirements of the Company provided that the Members' interests are not affected, except with the unanimous consent of the Members. No Member will be required to make Additional Contributions. Whenever additional capital is determined to be required and an individual Member is unwilling or unable to meet the additional contribution requirement within a reasonable period, as required by business obligations, the remaining Members may contribute in proportion to their existing Capital Contributions to resolve the amount in default. In such case the allocation of Net Profits or Losses of the Company among all the Members may be adjusted to reflect the aggregate change in Capital Contributions by the Members.

17. Any advance of money to the Company by any Member in excess of the amounts provided for in this Agreement or subsequently agreed to, will be deemed a debt due from the Company rather than an increase in the Capital Contribution of the Member. This liability will be repaid with interest at such rates and times to be determined by a majority of the Members. This liability will not entitle the lending Member to any increased share of the Company's profits nor to a greater voting power. Resolution of such debts may have preference or priority over any other payments to Members as may be determined by a majority of the Members.

Capital Accounts

18. An individual capital account will be maintained for each Member and their initial Capital Contribution will be credited to this account. Any Additional Contributions made by any Member will be credited to that Member's individual Capital Account.

Interest on Capital

19. No borrowing charge or loan interest will be due or payable to any Member on their agreed Capital Contribution inclusive of any agreed Additional Contributions.

Drawing Accounts

20. An individual drawing account will be maintained for each Member. Each Member will be entitled to draw against their share of the profits in such amounts and at such time as will be agreed by the Members. The drawing account is a temporary account and is expected to have a debit balance if there have been any withdrawals. At the end of each accounting year, the drawing accounts are closed by transferring the debit balance to each Member's capital account.

Compensation to Members for Services Rendered

21. Members will be compensated by the Company for services rendered to or on behalf of the Company. Members salary will be based on time worked in the business. Members must work in the business to receive salary compensation.

Manager	Manager Address
TBD	

23. Management compensation will be as follows:

Manager	Compensation
TBD	

24. The duties and responsibilities of the Managers will include the following:

26. A Manager will be reimbursed for expenses directly related to the operation of Company.
27. All the Members will be consulted and the advice and opinions of the Members will be obtained as much as is practicable. However, a Manager will have management and control of the day-to-day business of the Company for the purposes stated in this Agreement. All matters outside the day-to-day business of the Company will be by the Members as outlined elsewhere in this Agreement.
28. In addition to day-to-day management tasks and any other duties and responsibilities already identified in this Agreement, the Manager's duties will include keeping, or causing to be kept, full and accurate business records for the Company according to accepted accounting practices and overseeing the preparation of any reports considered reasonably necessary to keep the Members informed of the business performance of Company.
29. A Manager will not be liable to the Members for any action or failure to act resulting loss or harm to the Company except in the case of gross negligence or willful misconduct.
30. Subject to any declared duty of loyalty, a Manager may engage in activities with other business entities where they are or may become a member or manager. A transaction between the Company and another company in which the Manager has a financial interest will not be void for this reason alone. The transaction will be valid only where has been fully disclosed to the Members of the Company and they agree to the transaction.

34. Each Member will devote such time and attention to the business of the Company as the majority of the Members will from time to time reasonably determine for the conduct of the Company business.

Member Meetings

35. Member meetings will be held at the following address, or any other location that the Members may from time to time designate:

43 Ladd St
Florence MA
01062

36. Any impending Member meeting will require 30 days' notice be given to all Members.

37. A meeting may be called by any Member providing that appropriate notice has been provided to the other Members.

38. Regular Member meetings will be held according to the following schedule:
Semiannually in March and September.

39. There must be at least 51.00% of the Members present at a meeting for any decisions to be binding.

Admission of New Members

40. A new Member may only be admitted to the Company with a majority vote of the existing Members.
41. The new Member agrees to be bound by all the covenants, terms, and conditions of this Agreement, inclusive of all current and future amendments. Further, a new Member will execute such documents as are needed to effect the admission of the new Member. Any

new Member will receive such business interest in the Company as determined by a unanimous decision of the other Members.

Dissociation of a Member

42. Voluntary Withdrawal: No Member may voluntarily withdraw from the Company for a period of 12 months from the execution date of this Agreement. After the expiration of this period, any Member (the "Dissociated Member") will have the right to voluntarily withdraw from the Company at the end of any fiscal year. Written notice of intention to withdraw must be served upon the remaining Members at least 90 days prior to the fiscal year end. The withdrawal of such Member will have no effect upon the continuance of the Company business. If the remaining Members elect to purchase the interest of the withdrawing Member, the Members will serve written notice of such election upon the withdrawing Member within thirty (30) days after receipt of the withdrawing Member's notice of intention to withdraw, including the purchase price and method and schedule of payment for the withdrawing Member's interest. The purchase amount of any buyout of a Member's interest will be determined as outlined in the Valuation of Interest section of this Agreement. It remains incumbent on the withdrawing Member to exercise this right in good faith and to minimize any present or future harm done to the remaining Members as a result of the withdrawal.
43. Involuntary Withdrawal: Events leading to the involuntary withdrawal of a Member (the "Dissociated Member") from the Company will include but not be limited to: death of a Member; Member mental incapacity; Member disability preventing reasonable participation in the Company; Member incompetence; breach of fiduciary duties by a Member; criminal conviction of a Member; Operation of Law against a Member or a legal judgment against a Member that can reasonably be expected to bring the business or societal reputation of the Company into disrepute. Expulsion of a Member can also occur on application by the Company or another Member, where it has been judicially determined that the Member: has engaged in wrongful conduct that adversely and materially affected the Company's business; has wilfully or persistently committed a material breach of the Operating Agreement or of a duty owed to the Company or to the other Members; or has engaged in conduct relating to the Company's business that makes it not reasonably practicable to carry on the business with the Member. The withdrawal of such Member will have no effect upon the continuance of the Company business. If the remaining Members elect to purchase the interest of the withdrawing Member, the remaining Members will serve written notice of such election, including the purchase price and method and schedule of payment for the withdrawing Member's interest, upon the withdrawing Member, their executor, administrator, trustee, committee or analogous fiduciary within a reasonable period after acquiring knowledge of the change in circumstance to the affected Member. The purchase amount of any buyout of a Member's interest will be determined as outlined in the Valuation of Interest section of this Agreement.
44. On any purchase and sale made pursuant to this section, a Dissociated Member will only have liability for Company obligations that were incurred during their time as a Member. Immediately upon purchase of a withdrawing Member's interest, the Company will

prepare, file, serve, and publish all notices required by law to protect the withdrawing Member from liability for future Company obligations. Where the remaining Members have purchased the interest of a dissociated Member, the purchase amount will be paid in full, but without interest, within 90 days of the date of withdrawal. The Company will retain exclusive rights to use of the trade name and firm name and all related brand and model names of the Company.

45. The remaining Members retain the right to seek damages from a dissociated Member where the dissociation resulted from a malicious or criminal act by the dissociated Member or where the dissociated Member had breached their fiduciary duty to the Company or was in breach of this Agreement or had acted in a way that could reasonably be foreseen to bring harm or damage to the Company or to the reputation of the Company.

Buyout Agreement

46. In the event of a Member's interest in the Company becoming for sale, due to any reason, the remaining Members of the Company have a right of first purchase on the interest. The value of the interest in the Company will be determined as outlined in the Valuation of Interest section of this Agreement.

Assignment of Interest

47. Where a Member's financial interest in the Company is assigned to another party who is not an existing Member, that party will be treated as a new Member. An assignment of full Membership status inclusive of all duties, obligations, and rights held by the previous Member will be governed by the conditions described under the Admission of New Members section of this Agreement.
48. In the event that a Member's interest in the company is transferred or assigned as the result of a court order or Operation of Law, the trustee in bankruptcy or other person acquiring that Member's interest in the Company will only acquire that Member's economic rights and interests and will not acquire any other rights of that Member or be admitted as a Member of the Company or have the right to exercise any management or voting interests.

Valuation of Interest

49. In the absence of a written agreement setting a value, the value of the Company will be based on a fair market value as determined by a licensed business appraiser and in accordance with generally accepted accounting procedures. This appraisal will be conducted by an independent appraisal firm agreed to by all Members. An appraiser will be appointed within a reasonable period of the date of withdrawal or dissolution. The results of the appraisal will be binding on all Members. A withdrawing Member's interest will be in proportion to their Capital Contribution share in the Company, less any outstanding liabilities a Member may have to the Company. The

intent of this section is to ensure the survival of the Company despite the withdrawal of any individual Member.

50. No allowance will be made for goodwill, trade name, patents or other intangible assets, except where those assets have been reflected on the Company books immediately prior to valuation.

Dissolution

51. The Company may be dissolved by a unanimous vote of the Members. The Company will also be dissolved on the occurrence of events specified in the Act.
52. Upon Dissolution of the Company and liquidation of Company property, and after payment of all selling costs and expenses, the liquidator will distribute the Company assets to the following groups according to the following order of priority:
- a. in satisfaction of liabilities to creditors except Company obligations to current Members;
 - b. in satisfaction of Company obligations to current Members to pay debts; and
 - c. to the Members in proportion to their Capital Contributions to the Company.
53. The claims of each priority group will be satisfied in full before satisfying any claims of a lower priority group. Any excess of Company assets after liabilities or any insufficiency in Company assets in resolving liabilities under this section will be resolved by the Members in proportion to the respective Capital Contribution of each Member to the Company as set out in this Agreement.

B. DESCRIPTION OF HANDBOOK

None of the Company's personnel documents and benefit plans, including this Employee Handbook, constitutes, or is intended to constitute, an express or implied contract guaranteeing continued employment for any Employee. No Manager has any authority to enter into a contract of employment--express or implied--that changes or alters the at-will employment relationship. Only the Owner has the authority to enter into an employment agreement that alters the at-will employment relationship and any such agreement must be in writing.

All rights are reserved. No part of this Employee Handbook may be reproduced in any form or by any electronic or mechanical means, including information storage and retrieval systems, without permission in writing from the Owner.

Not all Pioneer Valley Extracts policies and procedures are set forth in this Employee Handbook. We have summarized only some of the more important ones. If you have

any questions or concerns about this Employee Handbook or any other policy or procedure, please ask the Owner.

II. EMPLOYMENT RELATIONSHIP

A. EMPLOYMENT AT WILL

While we hope that your employment will prove mutually satisfactory, please understand that continued employment cannot be guaranteed for any Employee. Employment at the Company is employment at will. This means that you are free to leave your employment at any time, with or without cause or notice, and the Company retains the same right to terminate your employment at any time, with or without cause or notice. This policy of at-will employment may be changed only by a written employment agreement signed by the Owner that expressly changes the policy of at-will employment. Unless your employment is covered by a written employment agreement, this policy of at-will employment is the sole and entire agreement between you and the Company as to the duration of employment and the circumstances under which employment may be terminated.

With the exception of employment at will, terms and conditions of employment with the Company may be modified at the sole discretion of the Company with or without cause or notice at any time. No implied contract concerning any employment-related decision or term or condition of employment can be established by any other statement, conduct, policy, or practice.

B. EQUAL EMPLOYMENT OPPORTUNITY EMPLOYER

Pioneer Valley Extracts is equal employment opportunity employers and strive to comply with all applicable laws prohibiting discrimination based on race, color, religion, sex, age, national origin or ancestry, physical or mental disability, veteran status, marital status, sexual orientation, possession of the sickle cell trait, religious creed, handicap, HIV-positive status, and any other basis protected by federal, state, or local laws. All such discrimination is unlawful and all persons involved in the operations of the Company are prohibited from engaging in this type of conduct. In accordance with applicable federal and state law protecting qualified individuals with known disabilities, the Company will attempt to reasonably accommodate those individuals unless doing so would create an undue hardship on the Company. Any qualified applicant or Employee with a disability who requires an accommodation in order to perform the essential functions of the job should contact the Owner and request an accommodation.

You must report every instance of unlawful discrimination or harassment to the Owner regardless of whether you or someone else is the subject of the discrimination. Detailed reports, including names, descriptions, and actual events or statements made, will greatly enhance the Company's ability to investigate. Any documents supporting the allegations should also be submitted. Based on your report, the Company will conduct an investigation. The Company prohibits any and all retaliation for submitting a report of unlawful discrimination and for cooperating in any investigation. Any supervisor or employee who retaliates against the accuser or those involved in the investigation will be disciplined, up to and including discharge from employment.

If the investigation determines that prohibited discrimination or other conduct that violates Company policy has occurred, the Company will take disciplinary action, up to and including termination of employment, against those engaged in the misconduct. The Company will also evaluate whether other employment practices should be added or modified in order to deter and prevent that conduct in the future. You will be informed of whatever action (s) the Company takes to resolve and remedy the situation.

III. COMMENCING EMPLOYMENT

A. BACKGROUND CHECKS

Due to the nature of the cannabis business, The Company will due a full background check of an individual's prior employment history, personal references, and educational background, as well as other relevant information that is reasonably available to the Company and required by the Commonwealth of Massachusetts, the Massachusetts Cannabis Control Commission and any other state or federal laws pertaining to employment of a marijuana establishment. The Company will review an applicant's or an Employee's credit report and criminal background, if any. In the event that a consumer report is obtained, the Company will comply with the federal Fair Credit Reporting Act and applicable state laws, including providing the job applicant or Employee with any required notices and forms. If you have any questions or need more information on immigration law issues, please contact your Manager.

C. HIRING RELATIVES

A familial relationship among Employees can create an actual or at least a potential conflict of interest in the employment setting, especially where one relative supervises another relative. To avoid this problem, the Company may refuse to hire or place a relative in a position where the potential for favoritism or conflict exists.

In other cases where a conflict or the potential for conflict arises, even if there is no supervisory relationship involved, the parties may be separated by reassignment or terminated from employment, at the discretion of the Company.

If two Employees marry, become related, or enter into an intimate relationship, they may not remain in a reporting relationship or in positions where one individual may affect the compensation or other terms or conditions of employment of the other individual. The Company will attempt to identify other available positions, and the Employees will have 30 days to decide which individual will remain in his/her current position. If no alternate position is available, the Employees will have 30 days to decide which Employee will remain with the Company. If this decision is not made in the time allowed, the Company will make the decision.

We refer to this initial period of employment as your introductory period.

The Company is committed to the fair payment of wages to all employees consistent with the requirements promulgated by the FLSA. PIONEER VALLEY EXTRACTS

G. POLICIES AGAINST WORKPLACE VIOLENCE

1. Statement of Policy

The costs of workplace violence can be great, both in human and financial terms. Therefore, the Company has adopted this policy regarding workplace violence.

Acts or threats of physical violence, including intimidation, harassment, and/or coercion, that involve or affect the Company or that occur on Company property or in the conduct of Company business off Company property, will not be tolerated. This prohibition against threats and acts of violence applies to all persons involved in Company operations, including, but not limited to, Pioneer Valley Extracts personnel, contract workers, temporary employees, and anyone else on Pioneer Valley extracts property or conducting Company business off Company property. Violations of this policy, by any individual, may lead to disciplinary and/or legal action as appropriate.

This policy is intended to bring Pioneer Valley Extracts into compliance with existing legal provisions requiring employers to provide a safe workplace; it is not intended to create any obligations beyond those required by existing law.

2. Definitions

Workplace violence is any intentional conduct that is sufficiently severe, offensive, or intimidating to cause an individual to reasonably fear for his or her personal safety or the safety of his or her family, friends, and/or property such that employment conditions are altered or a hostile, abusive, or intimidating work environment is created for one or more Pioneer Valley Extracts Employees. Workplace violence may involve any threats or acts of violence occurring on Company premises, regardless of the relationship between the Company and the parties involved in the incident. It also includes threats or acts of violence that affect the business interests of the Company or that may lead to an incident of violence on Company premises. Threats or acts of violence occurring off Company premises that involve Employees, agents, or individuals acting as a representative of the Company, whether as victims of or active participants in the conduct, may also constitute workplace violence. Specific examples of conduct that may constitute threats or acts of violence under this policy include, but are not limited to, the following:

- a. Threats or acts of physical or aggressive contact directed toward another individual;
- b. Threats or acts of physical harm directed toward an individual or his/her family, friends, associates, or property;
- c. The intentional destruction or threat of destruction of Company property or another Employee's property;
- d. Harassing or threatening phone calls;

- e. Surveillance;
- f. Stalking;
- g. Veiled threats of physical harm or similar intimidation; and
- h. Any conduct resulting in the conviction under any criminal code provision relating to violence or threats of violence that adversely affects the Company's legitimate business interests. Workplace violence does not refer to occasional comments of a socially acceptable nature. These comments may include references to legitimate sporting activities, popular entertainment, or current events. Rather, it refers to behavior that is personally offensive, threatening, or intimidating.

3. Enforcement

Any person who engages in a threat or violent action on Company property may be removed from the premises as quickly as safety permits and may be required, at the Company's discretion, to remain off Company premises pending the outcome of an investigation of the incident.

When threats are made or acts of violence are committed by an Employee, a judgment will be made by the Company as to what actions are appropriate with respect to that Employee, including potential medical evaluation and/or disciplinary action up to and including discharge.

Important Note: Pioneer Valley Extracts will make the sole determination of whether and to what extent, threats or acts of violence will be acted upon by the Company. In making this determination, the Company may undertake a case-by-case analysis in order to ascertain whether there is a reasonable basis to believe that workplace violence has occurred. No provision of this policy alters the at-will nature of employment at Pioneer Valley Extracts

R. POLICY REGARDING VIOLENT CRIME

1. Statement of Policy

Pioneer Valley Extracts recognizes the unfortunate reality that violent crimes do occur in the workplace. The potential for commission of a violent crime in the workplace may threaten the safety of Employees as well as customers. Therefore, due to the Company's concern for the safety of its Employees and customers, it is the Company's policy to provide guidelines to Employees about the signs of incipient violence and steps to take to prevent or ameliorate violence.

2. Guidelines for Protecting Employee and Customer Safety

Prevention is the threshold measure to protect Employee and customer safety. Accordingly, you should make a conscious effort to observe your surroundings and report any suspicious persons or activities to the police.

In the unfortunate event of a holdup or robbery, you should obey all orders issued by the perpetrator. Failure to follow the perpetrator's orders jeopardizes your safety as well as the safety of customers and other Employees. Therefore, remember to stay calm, move slowly, and cooperate with the perpetrator. Do not argue, fight, display a weapon, or offer any other form of resistance. To the extent possible, Employees should attempt to concentrate on the perpetrator's physical features, dress, voice, automobile, et cetera in hope of later identification.

Once the incident is over, you should remain where you are--do not attempt to follow or catch the perpetrator. Once you are certain that the perpetrator has left the immediate area, quickly secure the area and call the police. While waiting for the police to arrive, avoid touching anything or disturbing the area. If possible, write down everything you can remember about the incident and the perpetrator. Employees are expected to cooperate fully with the enforcement authorities after the occurrence of an incident.

The Company will consider your request in accordance with applicable law and the Company's leave policies. You will be notified whether your leave request is granted or denied. If you are granted leave, you must comply with the terms and conditions of the leave, including keeping in touch with the Owner during your leave, and giving prompt notice if there is any change in your return date.

2. Family & Medical Leaves

Family and Medical Leave Act Policy

Eligible employees may take up to 12 workweeks of unpaid, job-protected leave under the Family and Medical Leave Act ("FMLA") in a 12-month period for specified family and medical reasons.

Employee Eligibility

To be eligible for FMLA leave, you must:

1. Have worked at least 12 months for the Company; and
2. Have worked at least 1,250 hours for the Company over the preceding 12 months

Conditions Triggering Leave

FMLA leave may be taken for the following reasons:

1. Birth of a child, or to care for a newly born child or placement of a child with the employee for adoption or foster care;
2. To care for an immediate family member (spouse, child, or employee's parent) with a serious health condition; or
3. Because of the employee's serious health condition which makes the employee unable to perform the functions of the employee's job.

Duration of Leave

Eligible employees may receive up to 12 workweeks of unpaid leave during any "rolling" 12-month period, measured backward from the date of any FMLA leave. FMLA leave for the birth or placement of a child for adoption or foster care must be concluded within 12 months of the birth or placement.

You may take FMLA leave intermittently, or by reducing your normal weekly or daily work schedule, when medically necessary for your own or immediate family member's serious health condition. Intermittent leave is not permitted for birth of a child, to care for a newly born child or for placement of a child for adoption or foster care. Employees who require intermittent leave or reduced-schedule leave must try to schedule their leave so that it will not disrupt the Company's operations.

Benefits during Leave

Depending on the purpose of your leave request the Company will require you to use accrued paid leave, if available, concurrently with some or all of the FMLA leave. In addition, you will not be eligible to accrue seniority or benefits, including vacation and holidays, during any period of an FMLA leave.

Maintenance of Health Benefits

If you and/or your family participate in our group health plan, the Company will maintain coverage under the plan during your FMLA leave on the same terms as if you had continued to work. If applicable, you must make arrangements to pay your share of health plan premiums while on leave. In some instances, the Company may recover premiums it paid to maintain health coverage or other benefits for an employee and family.

Job Restoration

Upon returning from FMLA leave, you will normally be restored to your original job or to an equivalent job with equivalent pay, benefits, and other employment terms and conditions.

3. Military Leave (Active and Reserve Service)

If eligible, leave without pay is provided to you when you enter the uniformed services, as defined by federal or state law. For example, the uniformed services include military services with the Armed Forces of the United States or the Armed Forces Reserves. You may be entitled to reemployment rights and retention of full seniority benefits for all prior service upon reemployment under the Uniformed Services Employment and Reemployment Rights Act of 1994 and Florida law. You need to bring your military service orders to the Owner for review prior to commencement of the leave.

Temporary Employees may not be eligible for reinstatement following military leave, and reinstatement may not be required for other Employees in some circumstances. Contact the Owner for information pertinent to your situation.

As with other leaves of absence, failure to return to work or to reapply within applicable time limits may result in termination of employment.

VII. TERMINATION

A. VOLUNTARY TERMINATIONS

If you decide to leave your employment with Pioneer Valley Extracts we ask that you give us at least two weeks written notice. This will give us the opportunity to make the necessary adjustments in our operation. You are required to return all property owned by the Company (e.g., vehicles, computers, keys, uniforms, identification badges, and credit cards) prior to your departure.

B. INVOLUNTARY TERMINATIONS

While the decision to commence employment is consensual, the same is not always true when the time comes to end the employment relationship. As an at-will employer, the Company reserves the right to end the employment relationship at any time, with or without cause or notice. In the event your employment is terminated, you are required to return all property owned by the Company to the Owner prior to your departure.

C. REDUCTIONS IN FORCE

While the Company hopes to continue growing and providing employment opportunities, business conditions, customer demand, and other factors are unpredictable. Changes or downturns in any of these or other areas could create a need to restructure or reduce the number of people employed. In light of these uncertainties, please be advised that it may become necessary to conduct layoffs at some point in the future.

In the event that the Company determines to lay off any Employee or a number of Employees, the Company retains full discretion to select, which Employee(s) will be laid off. While Pioneer Valley Extracts retains full discretion, some of the relevant factors might include the Company's operational requirements and the skill, productivity, ability, and past performance of those involved.

Since this time is counted and paid as time worked, you must not be absent from your workstations beyond the time allotted for the rest period time.

D. TIME AND PAY

Hourly employees are required to record and accurately allocate their time worked each day. Your Supervisor will inform you of the use of time clocks or timecards. At the end of the pay period, you must review and approve with your signature the times being

You are required to wear appropriate attire at all times whether at the office, representing the Company at an industry event, or in the field. You must be dressed in a neat and professional manner. The Company may provide specific guidelines of acceptable attire.

G. USE OF TECHNOLOGY AND THE INTERNET

The Company's technical resources--including desktop and portable computer systems, fax machines, Internet access, voice mail, and electronic mail (e-mail)--enable Employees quickly and efficiently to access and exchange information throughout the Company and around the world. When used properly, we believe these resources greatly enhance Employee productivity and knowledge. In many respects, these new tools are similar to other Company tools, such as stationery, file cabinets, photocopiers, and telephones. Because these technologies are both new and rapidly changing, it is important to explain how they fit within the Company and within your responsibilities as an Employee.

This policy applies to all technical resources that are owned or leased by the Company, that are used on or accessed from Company premises, or that are used on Company business. This policy also applies to all activities using any Company-paid accounts, subscriptions, or other technical services, such as Internet access, voice mail, and e-mail, whether or not the activities are conducted from Company premises.

NOTE: As you use the Company's technical resources, it is important to remember the nature of the information created and stored there. Because they seem informal, e-mail messages are sometimes offhand, like a conversation, and not as carefully thought out as a letter or memorandum. Like any other document, an e-mail message or other computer information can later be used to indicate what an Employee knew or felt. You should keep this in mind when creating e-mail messages and other documents. Even after you delete an e-mail message or close a computer session, it may still be recoverable and may even remain on the system.

1. Acceptable Uses

The Company's technical resources are provided for the benefit of the Company and its customers, vendors, and suppliers. These resources are provided for use in the pursuit of Company business and are to be reviewed, monitored, and used only in that pursuit.

Employees are not permitted to use the Company's technical resources for non-work purposes. Accordingly, Employees have no right of privacy as to any information or file maintained in or on the Company's property or transmitted or stored through the Company's computer, voice mail, e-mail, or telephone systems.

2. Unacceptable Uses

The Company's technical resources should not be used for personal gain or the advancement of individual views. Employees who wish to express personal opinions on the Internet are encouraged to obtain a personal account with a commercial Internet service provider and to access the Internet without using Company resources.

Solicitation for any non-Company business or activities using Company resources is strictly prohibited. Your use of the Company's technical resources must not interfere with your productivity, the productivity of any other Employee, or the operation of the Company's technical resources.

You should not send e-mail or other communications that either mask your identity or indicate that they were sent by someone else. You should never access any technical resources using another Employee's password. Similarly, you should only access the libraries, files, data, programs, and directories that are related to your work duties. Unauthorized review, duplication, dissemination, removal, installation, damage, or alteration of files, passwords, computer systems or programs, or other property of the Company, or improper use of information obtained by unauthorized means, is prohibited.

Sending, saving, or viewing offensive material is prohibited. Messages stored and/or transmitted by computer, voice mail, e-mail, or telephone systems must not contain content that may reasonably be considered offensive to any Employee. Offensive material includes, but is not limited to, sexual comments, jokes or images, racial slurs, gender-specific comments, or any comments, jokes or images that would offend someone on the basis of his or her race, color, religion, sex, age, national origin or ancestry, physical or mental disability, veteran status, marital status, possession of the sickle cell trait, religious creed, handicap, HIV-positive status, as well as any other category protected by federal, state, or local laws. Any use of the Internet to harass or discriminate is unlawful and strictly prohibited by the Company. Violators will be subject to discipline, up to and including discharge.

The Company does not consider conduct in violation of this policy to be within the course and scope of employment or the direct consequence of the discharge of one's duties. Accordingly, to the extent permitted by law, the Company reserves the right not to provide a defense or pay damages assessed against Employees for conduct in violation of this policy.

3. Access to Information

The Company asks you to keep in mind that when you are using the Company's computers you are creating Company documents using a Company asset. The Company respects the individual privacy of its Employees. However, that privacy does not extend to an Employee's work-related conduct or to the use of Company-provided technical resources or supplies.

Electronic information created and/or communicated by an Employee using Company tools, such as software, Internet access, voice mail, telephones, and e-mail, will generally not be monitored by the Company. Please keep in mind the following:

1. The Company monitors the performance, usage, and cost-effectiveness of its technical resources and periodically gathers information such as the number, frequency, time of day, and duration of calls or Internet site visits.
2. The Company may, in its discretion, review any Employee's electronic files and messages as well as the volume and content of usage.

Remember that your electronic communications and files are neither private nor confidential. They may be read by others within the Company and outside it without first obtaining your permission. If there is information that you do not want to be available to others, you should send that information in other ways.

4. Copyrighted Materials

You should not copy and distribute copyrighted material (e.g., software, database files, documentation, articles, graphics files, and downloaded information) through the e-mail system or by any other means unless you have confirmed in advance from appropriate sources that the Company has the right to copy or distribute the material. Failure to observe a copyright may result in disciplinary action by the Company as well as legal action by the copyright owner. Any questions concerning these rights should be directed to your Manager.

5. Confidential Information

E-mail and Internet/Web access are not entirely secure. Others outside the Company may also be able to monitor your e-mail and Internet/Web access. For example, Internet sites maintain logs of visits from users; these logs identify which company, and even which particular person, accessed the service. If your work using these resources requires a higher level of security, please ask your Manager or Management for guidance on securely exchanging e-mail or gathering information from sources such as the Internet or World Wide Web.

All Employees should safeguard the Company's confidential information, as well as that of customers and others, from disclosure. Do not access new voice mail or e-mail messages with others present. Messages containing confidential information should not be left visible while you are away from your work area.

E-mail messages containing confidential information should include the following statement, in all capital letters, at the top of the message: **CONFIDENTIAL: UNAUTHORIZED USE OR DISCLOSURE IS STRICTLY PROHIBITED.**

6. Security of Information

Although you may have passwords to access computer, voice mail, and e-mail systems, these technical resources belong to the Company, are to be accessible at all times by

the Company, and are subject to inspections by the Company with or without notice. The Company may override any applicable passwords or codes to inspect, investigate, or search an Employee's files and messages. All passwords must be made available to Management upon request. You should not provide a password to other Employees or to anyone outside the Company and should never access any technical resources using another Employee's password.

In order to facilitate the Company's access to information on its technical resources, you may not encrypt or encode any voice mail or e-mail communication or any other files or data stored or exchanged on Company systems without the express prior written permission from Management and your Manager. As part of this approval, Management will indicate a procedure for you to deposit any password, encryption key or code, or software with Management so that the encrypted or encoded information can be accessed in your absence.

7. Software Policy

If you want to install software on Company computers, you must contact Management and request to have the software installed. Employees are prohibited from installing any software on any Company technical resource without the express prior written permission from Management.

Involving Management ensures that the Company can manage the software on Company systems, prevent the introduction of computer viruses, and meet its obligations under any applicable software licenses and copyright laws. Computer software is protected from unauthorized copying and use by federal and state law; unauthorized copying or use of computer software exposes the Company and the individual Employee to substantial fines and exposes the individual Employee to imprisonment. Therefore, Employees may not load personal software onto the Company's computer system and may not copy software from the Company for personal use.

8. Your Responsibilities

Each Employee is responsible for the content of all text, audio, or images that they place or send over the Company's technical resources. Employees may access only files or programs, whether computerized or not, that they have permission to enter.

Violations of any guidelines in this policy may result in disciplinary action up to and including termination. In addition, the Company may advise appropriate legal officials of any illegal violations.

H. CELLULAR TELEPHONES

This policy outlines the use of personal cell phones at work. The personal use of business cell phones and the safe use of cell phones by employees while driving.

- **Personal Cellular Phones**

While at work, you are expected to exercise the same discretion in using personal cellular phones as is expected for the use of Company phones. Excessive personal calls during the workday, regardless of the phone used, can interfere with employee productivity and be distracting to others. You are asked to make personal calls on non-work time where possible and to ensure that friends and family members are aware of the Company's policy. Flexibility will be provided in circumstances demanding immediate attention.

- **Company Provided Cellular Phones**

Where job or business needs demand immediate access to an employee the Company may issue a business cell phone to you for work-related communications. To protect you from incurring a tax liability for the personal use of this equipment, such phones are to be used for business reasons only. Company Provided Cellular Phones are not to be used to stream music or videos on company time or that incur extraordinary data utilization. Data use greater than 3 gig per month will be charged back to the employee and deducted from pay.

When you are in possession of Company equipment such as cellular phones you are expected to protect the equipment from loss, damage or theft. Upon resignation or termination of employment, or at any time upon request, you may be asked to produce the phone for return or inspection. If you separate from employment with outstanding debts for equipment loss or unauthorized charges you will be considered to have left employment on unsatisfactory terms and may be subject to legal action for recovery of the loss.

- **Safety Issue for Cellular Phone Use**

If your job responsibilities include regular or occasional driving and you are issued a cell phone for business use you are expected to refrain from using the phone while driving. Safety is a priority at all times. Regardless of the circumstances, including slow or stopped traffic, you are strongly encouraged to follow all safety procedures before placing or accepting a call, including the use of "hands free" equipment. When acceptance of a call is unavoidable, you are expected to keep the call short, use hands-free options if available refrain from discussion of complicated or emotional issues and keep your eyes on the road. If it is practical, you are encouraged to legally park somewhere to make or continue a telephone call while in your vehicle. Special care should be taken in situations where there is traffic, inclement weather or in situations where the employee is driving in an unfamiliar area.

In situations where job responsibilities include regular driving and accepting of business calls, "hands free" equipment will be provided to facilitate the provisions of this policy. If your job responsibilities do not specifically include driving as an essential function, but you are issued a cell phone for business use, you are also expected to abide by the provisions above. Under no circumstances shall you place yourself at risk to fulfill business needs. Safety is a priority at all times and in all situations.

If you are charged with traffic violations resulting from the use of your phone while driving you will be solely responsible for all liabilities that result from such actions and you may be subject to disciplinary action.

- **Personal Phone Calls**

Hazard Communication Program Training

Policy

Pioneer Valley Extracts has established a written hazard communication program to ensure that employees with exposure or potential exposure to hazardous chemicals are provided with appropriate health and safety information. The written hazard communication program applies to all areas where employees are exposed to hazardous chemicals during their work or in a foreseeable emergency.

Supervisors or managers of storage areas where the containers remain sealed are responsible only for maintaining and making available the material safety data sheets for the hazardous chemicals stored, not removing or defacing the container labels, and for the information and training requirements of this program to the extent necessary to protect employees in the event of a spill or leak.

Laboratories covered under a written chemical hygiene plan need only comply with the requirements for maintaining container labels, the requirements for providing labels and material safety data sheets when transporting or shipping hazardous chemicals outside the laboratory, and the requirement to maintain material safety data sheets that are received with shipments of hazardous chemicals.

For the purposes of this program, hazardous chemical shall mean any chemical that is a physical or health hazard as defined in the standard, including mixtures and gases.

Hazard Determination

PVX will rely on material safety data sheets from suppliers to meet hazard determination requirements. It is strongly encouraged, however, that employees seek out additional sources of safety and health information rather than rely solely on material safety data sheets.

Labeling

The need for adequate labeling extends far beyond the immediate requirements of the individual user, since the individual user may not be present in case of fire or explosion when containers are broken or spilled. The individual user may not be around years later when the containers have deteriorated or otherwise lost their value. Therefore, do not use wax pencil markings, abbreviations, formulas only, code names, or numbers. All labeling will be in conformance with Massachusetts Right-to-Know legislation and the following:

- The immediate supervisor for each work area or unit will be responsible for ensuring that all containers received or shipped are properly labeled.

- Labels on incoming containers of hazardous chemicals may not be removed or defaced unless the container is immediately marked with all of the required information.
- The labels on all containers will include:
 - the identity of the hazardous chemical(s); and
 - appropriate hazard warnings or combination of words, pictures, and symbols that provide at least general information regarding the hazards of the chemicals, and which, in conjunction with the other information immediately available to employees under the hazard communication program, will provide employees with the specific information regarding the physical and health hazards. The hazard warnings and information must also be in accordance with the labeling requirements of any substance-specific standards applicable to the chemical.
- Supervisors will be responsible for ensuring that all portable containers used in their work areas are labeled with identity and hazard warning unless the chemical is used by the person who made the transfer and is present only during the shift the transfer was made.

Material Safety Data Sheets

- Each department will designate where the Material Safety Data Sheets for all hazardous chemicals to which various employees may be exposed will be kept and ensure that they are systematically organized and that each affected employee knows how to access them.
- Supervisors will be responsible for properly displaying the required MIOSHA Right To Know poster and postings for notifying employees of new or revised Material Safety Data Sheets in their areas.

Employee Information and Training

The facility manager will be responsible for ensuring that initial and refresher training is performed as required in each department. Records of training conducted will be maintained by each department.

Employees who work in an area where there is exposure to hazardous chemicals during use or in foreseeable emergencies will receive hazard communication training at the time of initial assignment and whenever a new physical or health hazard for which they have not been trained is introduced into their work area. Information and training may be designed to cover categories of hazards or specific chemicals. Employees must be informed of:

- the training requirements of the hazard communication standard;
- any operations in their work area where hazardous chemicals are present; and

- the location and availability of this written hazard communication program, including the required hazardous chemical inventory and material safety data sheets required by this program.

Employee training shall include at least all of the following:

- Methods and observations that may be used to detect the presence or release of a hazardous chemical in the work area (for example: odor, appearance, monitoring devices, etc).
- The physical and health hazards of the chemicals in the work area.
- The measures employees can take to protect themselves from these hazards, including specific procedures the employer has implemented to protect employees from exposure to hazardous chemicals, such as appropriate work practices, emergency procedures, and personal protective equipment to be used.
- The details of the hazard communication program developed by PVX, including an explanation of the labeling system and the material safety data sheet, and how employees can obtain and use the appropriate hazard information.

Recordkeeping

Each department shall be responsible for maintaining the most recent training record for each affected employee for the duration of employment. The training record shall include the training topics covered, the instructor's name, date of training and the signature of each employee trained.

Material safety data sheets will be maintained for a minimum of 30 years after the last use of the chemical. Material safety data sheets for chemicals still in use or storage shall be replaced by updated sheets when they become available.

A written or electronic inventory of each hazardous chemical shall be maintained within each department and updated at least annually. The inventory will include the chemical or product name, the amount present, and the work area(s) where it is used.

Non-routine Tasks

Prior to beginning any non-routine task involving actual or potential exposure to hazardous chemicals, employees will be informed of the hazards present and be given training in appropriate work practices and the use of any personal protective equipment necessary. Required personal protective equipment will be provided to the employee before starting the task. Hand protection will be selected on the basis of MSDS recommendations, the physical environment, and the manufacturer or vendor's chemical resistance and permeation data when it is available. The employee's supervisor, the area supervisor, or Environmental Health and

Safety will be responsible for the selection of personal protective equipment and clothing and for training related to non-routine tasks.

A non-routine task is one that the employee does not normally perform and for which the employee has not previously been trained. An example of a non-routine task would be when a custodian is asked to clean chemical residue from a floor or remove spill debris after a chemical spill in a laboratory. In this example the laboratory supervisor would have primary responsibility for selection of personal protective equipment and training.

Outside Contractors and Vendors

The manager of the department responsible for soliciting the services of an outside contractor or vendor shall be responsible for ensuring compliance with the requirements of this section if the contractor's employees may be exposed to chemical hazards while working at The PVX facility.

The outside contractor or vendor shall be informed of the following:

- How material safety data sheets will be made available for each hazardous chemical their employees may be exposed to while working.
- Any precautionary measures that need to be taken to protect employees under normal operating conditions and in foreseeable emergencies.
- The type of labeling used in the work area.

The Hazard Communication Plan requires containers to be properly labeled and Material Safety Data Sheets to be maintained in an organized collection and available at all times to employees in each work area. It also requires each employee to be trained in the interpretation of Material Safety Data Sheets, the protective measures to be taken, the symptoms of exposure, and other information related to the substances they use. Each person who supervises employees exposed to substances regulated by the MIOSHA Hazard Communication Standard must be familiar with this Hazard Communication Plan and comply with its requirements.

Labeling Requirements for Hazardous Chemicals

1. The MIOSHA hazard communication standard requires labels on all original containers received from the manufacturer or vendor to have the following information:
 - a. Product identifier (chemical or product name)

- b. Signal word ("danger" or "warning" – "Danger" is used for the more severe hazards, while "warning" is used for the less severe hazards)
- c. Hazard statement(s) (a statement assigned to a hazard class and category that describes the nature of the hazard(s))
- d. Pictograms(s)
- e. Precautionary statement(s), and
- f. Name, address, and telephone number of the chemical manufacturer, importer, or other responsible party

These labels may not be removed or defaced while the substance is in the workplace. If part or all of the information on the label becomes illegible, a new label with the same information must be created and affixed to the container.

It is recommended that containers be dated on receipt and working containers be dated when filled or topped off. This helps prevent the expiration of older stock and assists in disposal decisions.

2. Secondary container labels (portable containers, spray bottles, sample bottles, flasks, etc., containing the original substance, working solutions, or mixtures) must have the following information:

- a. Either the items listed in 1), above, or:
- b. The hazardous chemical name(s) [the names must be the same as those used on the original container and the SDS] and a written description or GHS pictograms showing the hazard(s) present. Mixtures and solutions must include the names and concentrations of all components in the container, for example, 10% Clorox Bleach in water or 5 molar hydrochloric acid.

Secondary container labels must be legible and durable so that the information cannot be easily washed off or stained. If part or all of the information on the label becomes illegible, a new label with the same information must be created and affixed to the container.

Example label in accordance with 2) b), above:

10% Clorox Bleach in water

Causes mild skin irritation and serious eye irritation

Compressed Gases

Compressed gas cylinders, either empty or full, shall be used, handled, and stored in accordance with the following:

- Compressed gases cylinders must be stored in a vertical position and may not be stored in hallways, stairwells, receiving areas, or locations where they are subject to damage.
- A chain, bracket, clamp, or other restraining device shall be used at all times to prevent cylinders from falling.
- Acetylene or liquefied gas cylinders shall not be placed on their sides, but shall be stood valve-end up.
- A cylinder, whether empty or full, shall not be used as a roller or as a support.
- A cylinder, whether empty or full, in storage or during shipment, shall have the valve closed and cap connected in place, if a cap is provided in the design, or the valve shall be otherwise protected.
- Cylinders shall be marked with either the chemical or trade name. Marking shall be by stenciling, stamping, or labeling and shall not be tampered with or be readily removable. If the labeling is unclear or defaced, return the cylinder or obtain a new label from the supplier. Unlabeled cylinders shall not be used.
- Empty cylinders shall be marked “empty” or “MT” at time of depletion.
- Cylinders of oxidizers such as oxygen shall be stored at least 20 feet from fuel gas cylinders or a highly combustible material such as, but not limited to, oil, grease, flammable gas or a source of ignition, or be separated from the material by a noncombustible wall, not less than five feet high, having a fire resistance rating of one hour. All cylinders shall be stored away from heat in excess of 125 degrees Fahrenheit.
- Where different gases are stored, they shall be grouped by types. Groupings shall separate the flammable gases from the oxidizing gases.
- Storage shall be set up to ensure “first-in, first-out” usage.
- A cylinder storage area shall be posted with the names of the individual gases stocked, and a warning posted against tampering by an unauthorized employee. An assigned storage area shall be located where a cylinder will not be knocked over or struck by a passing or falling object.
- A storage area for cylinders shall be well ventilated. A cylinder shall not be stored in basements or pits except where appropriate ventilation is furnished to keep the area purged of any accumulation of gases.

- Cylinders shall be transported in an upright position and securely fastened by a restraining device to the truck or handcart. Approved handcarts are to be used when transporting cylinders within a building.
- When transported, the regulator must be removed and the protective cap replaced.
- A cylinder shall not be dropped, dragged, rolled on its side, or struck violently.
- A cylinder shall be lifted only by enclosed platforms when using a crane or hoisting device. Electromagnets, ropes, or slings shall not be used.
- When transporting cylinders in an elevator, other passengers should not be allowed to occupy the elevator.
- Use cylinders in an upright position and secure them firmly with chains or clamps.
- Do not use a cylinder of compressed gas without reducing the pressure through a regulator attached to the cylinder valve.
- Use regulators and pressure gauges only with gas for which they were designed and intended. Do not use adapters or modify connectors to circumvent this rule.
- Make sure the threads on a regulator or union correspond with those on the cylinder valve outlet. Do not force mismatched connections.
- Never use oil or grease on valves or attachments for oxygen cylinders. Avoid handling oxygen cylinders and apparatus with oily hands, gloves, or clothing.
- Open cylinder valves slowly with valve outlet directed away from personnel. Close the main cylinder valve as soon as it is no longer necessary to have it open.
- Gases shall not be mixed within a cylinder except by the supplier.
- A cylinder shall not be placed where it will become a part of the electrical circuit by accidental grounding or where it may be burned by electric welding arc. A cylinder shall not be placed so that hot slag or flame will reach it or it shall be protected by a fire resistant shield. An electrode shall not be tapped against a cylinder to strike an arc.
- A frozen or ice-clogged valve shall be thawed either by warm air or use of warm water and dried before using. Boiling water or a flame shall not be used. Force shall not be applied to a valve or cap to loosen a cylinder frozen in place.
- A cylinder without fixed hand wheels shall have keys, handles, or non-adjustable wrenches on valve stems while in service. A multiple cylinder installation shall require only one key or handle for each manifold. A hammer shall not be used to open a cylinder valve or loosen a cap.

- A leaking cylinder or a cylinder with a valve stuck open or a valve in need of repair shall be taken outdoors —if it is safe to do so—away from sources of ignition, slowly emptied, tagged with a warning sign, and the manufacturer or distributor notified. Complete removal of the stem from the cylinder valve shall be avoided.
- Nothing shall be placed on top of a cylinder that would damage a safety device or interfere with the quick closing of the valve.
- Return empty cylinders to the vendor as soon as possible.

Flammable Liquids

Storage of flammable liquids in buildings shall be limited to that required for Extraction and post processing and to the following restrictions:

- Containers of Class IA liquids shall not exceed one pint capacity for glass containers, one gallon capacity for metal, or two gallons capacity for safety cans.
- Containers of Class IB liquids shall not exceed one quart capacity for glass containers, one gallon capacity for metal, or two gallons capacity for safety cans.
- Containers of Class IC liquids shall not exceed one gallon capacity for glass containers, one gallon capacity for metal, or two gallons capacity for safety cans.
- Containers of combustible liquids shall not exceed one gallon capacity for glass containers or five gallons capacity for metal containers and safety cans.
- Not more than ten gallons (or 25 gallons in safety cans) of Class I and combustible liquids combined shall be stored in a single fire area outside of a UL-listed or FM-approved storage cabinet or an inside flammable liquids storage area.
- Definitions: Class IA flammable liquid—a liquid having a flash point below 73 F (22.8 C) and having a boiling point below 100 F (37.7 C). Class IB flammable liquid—a liquid having a flash point below 73 F (22.8 C) and having a boiling point at or above 100 F (37.7 C). Class IC flammable liquid—a liquid having a flash point at or above 73 F (22.8 C) and below 100 F (37.7 C). Combustible liquid—a liquid having a flash point at or above 100 F.

 - If at any point during processing the alarm goes off, check monitor to determine level
 - Proceed as following for the following levels
 - 1000 ppm: alarm goes off. This is still a safe zone; check for system leaks, tighten fittings, and ensure valves are in the correct configuration
 - 1300 ppm: increase room ventilation. Look for source of leak.
 - 1600 ppm: turn off CO₂ cylinder and pump. Look for source of leak.
 - 1900+ ppm: Shut down operations. Close CO₂ valve and turn off pump. Further increase ventilation and clear room until levels are deemed safe (Note: alarm will stop sounding at safe levels. Have engineering team inspect equipment to determine cause of excess atmospheric CO₂. Do not operate machine until verified safe and issue is resolved
- Note CO₂ extraction machine will be operating at elevated temperatures. May cause burns.
- Note CO₂ separation vessel may be cold and will build frost. May cause frostbite.

12C. Gross Dewatering

Materials and Equipment:

General

- CO₂ processed cannabis crude
- Water bath
- Glass collection jars
- Laboratory balance
- Spatula
- Heat gun

Safety

- Nitrile or Latex gloves
- Heat gloves

Procedure

1. Set water bath to 60 degC
2. Make sure that the crude is not in the neck of the jar. If it is, open the jar and wipe down the threads and seal to remove any crude. Heat the top of the jar with a heat gun so that all of the material falls/drips down further into the jar. Allow the jar to cool to the touch before continuing with the next step.
3. Put jar of CO2 processed cannabis in water bath making sure that the water line is above the fill line on the jar
4. Let the jar sit in the water bath until a clear/horizontal separation has occurred.
5. Remove the jar from the water bath and allow it to sit and cool until the extract layer is fully solidified.
6. Open the jar and insert a flat tool (lab spoon or spatula) between the jar wall and the extract and push the extract aside to provide a clear path for the water to escape.
7. Drain the water.

Safety

- Caution, hot surfaces

12D. Final Dewatering

Materials and Equipment

General

- Hot water bath
- Chiller
- Vacuum pump
- Jars of extract that have been gross dewatered
- Rotary evaporator with bath filled with water or safflower oil
- Evaporative flask
- Laboratory balance
- Flask stand/holder
- Flashlight

Safety

- Nitrile/Latex gloves
- Temperature resistant gloves
- Safety glasses
- Long pants
- Enclosed shoes

Procedure

1. Turn on the chiller (set point should be below 0 degC).
2. Heat a water bath to 60 degC
3. Place jars of gross dewatered extract into the water bath until the extract is melted.
4. Take a tare weight of the evaporative flask.

5. Remove the jar(s) from the water bath and dry them with a towel
6. Pour desired amount of the molten extract into the evaporative flask.
7. Record the weight of extract used.
8.
 - a. Note: do not fill the flask more than ½ full. There must be room to allow for mixing and exposure to the vacuum in the flask.
9. Grease the flask nipple and attach the flask to the rotavap making sure that the connection is secure.
10. Turn on the main power to the rotavap and very carefully lower the flask into the water or oil.
11. Turn on the bath and set it to 70degC.
12. Start rotation on the flask (slowly at first and then speed up as needed to agitate the extract)
 - b. NOTE: at certain speeds the rotation causes the bath liquid to make “waves” and slosh. When the liquid is hot, this is dangerous, so do not overfill the bath and pay attention to the bath liquid level and movement.
13. Once the bath is at 70degC turn on the vacuum pump and carefully lower the pressure to cause the water to evaporate from the crude.
 - c. NOTE: GO SLOWLY! If you reduce pressure too quickly the crude will “bump”. This happens when water is trapped in the thicker crude and the pressure differential is too great. The water will then vaporize from under the surface of the crude and send a splash of crude into condenser and the water collection flask
14. At 100mbar, hold pressure until there is little to no condensation in the condenser.
15. Start slowly lowering the pressure again until the vacuum will no longer reduce and there is no liquid dripping into the catch flask for at least 30 seconds.

12E. Making Oil

Materials and Equipment

General

- Vacuum Pump
- Chiller
- Centrifuge
- Laboratory balance

- Spatulas (silicone)
- Ethanol
- Evaporative flasks
- Collection flasks
- Flask stands (cork)

- Vacuum grease

Safety

- Nitrile or Latex gloves
- Temperature resistant gloves

Procedure

1. Turn on hot water bath to 60°C, chiller to -4°C, and vacuum pump
2. Combine a measured amount of extract with 190 proof ethanol at a 1:4 ratio by weight in mason jar, cap, and heat in a 60°C water bath until mixture is single phase
3. Remove mason jar from heat
4. Transfer contents to clean centrifuge tubes
 - a. Make sure all centrifuge tubes are same weight +/- 1 gram
5. Cool material in centrifuge tubes
6. Place in centrifuge ensuring caps are tight
7. Centrifuge at 3800 RPM for 10 minutes or until clear separation has occurred
8. Decant top layer into evaporative flask
9. Continue steps 3-7 until all material in mason jar has been centrifuged and decanted
10. Grease both the male adaptor on rotary evaporator and female connection on flask
11. Ensure RotoVap arm is raised
12. Connect flask to rotary evaporator and ensure neck will not slip by using bracket on ridges in neck of flask
13. Gently lower flask into hot water ensuring flask has ½" clearance from the bottom of the water bath
14. Start spinning flask
15. Allow material in flask to reach temperature equilibrium with water bath
16. Turn on vacuum controller on RotoVap and begin creating vacuum
17. Slowly reduce vacuum to vaporize ethanol
 - a. Bring pressure down as low as possible
 - b. Ensure not to bring pressure down too quickly or material will bump (rapidly bubble and splatter into condenser
18. Process is complete when flask is at minimum pressure and no drips have occurred for 10 minutes
19. Tare a clean mason jar and write weight on side
20. Stop rotation
21. Support flask by neck, lift up, and remove flask
22. Wipe down neck of evaporative flask with clean paper towel
23. Dry off outside of flask
24. Pour flask contents into mason jar and weigh
 - a. Product weight is final weight – tare weight
25. Label jar with weight of product, OLCC tag number, and date created
 - a. Enter this information into the process datasheet

Safety:

- Water is at elevated temperature and may cause burning.
- Ethanol is flammable and ethanol vapors are heavier than air. No open flames
- Chiller is cold and can cause frostbite
- Flask can slip and splash hot water if not supported

R. POLICY REGARDING VIOLENT CRIME

1. Statement of Policy

Pioneer Valley Extracts recognizes the unfortunate reality that violent crimes do occur in the workplace. The potential for commission of a violent crime in the workplace may threaten the safety of Employees as well as customers. Therefore, due to the Company's concern for the safety of its Employees and customers, it is the Company's policy to provide guidelines to Employees about the signs of incipient violence and steps to take to prevent or ameliorate violence.

2. Guidelines for Protecting Employee and Customer Safety

Prevention is the threshold measure to protect Employee and customer safety. Accordingly, you should make a conscious effort to observe your surroundings and report any suspicious persons or activities to the police.

In the unfortunate event of a holdup or robbery, you should obey all orders issued by the perpetrator. Failure to follow the perpetrator's orders jeopardizes your safety as well as the safety of customers and other Employees. Therefore, remember to stay calm, move slowly, and cooperate with the perpetrator. Do not argue, fight, display a weapon, or offer any other form of resistance. To the extent possible, Employees should attempt to concentrate on the perpetrator's physical features, dress, voice, automobile, et cetera in hope of later identification.

Once the incident is over, you should remain where you are--do not attempt to follow or catch the perpetrator. Once you are certain that the perpetrator has left the immediate area, quickly secure the area and call the police. While waiting for the police to arrive, avoid touching anything or disturbing the area. If possible, write down everything you can remember about the incident and the perpetrator. Employees are expected to cooperate fully with the enforcement authorities after the occurrence of an incident.

VI. BENEFITS

LEAVES OF ABSENCE

1. General Provisions

Pioneer Valley Extracts may grant a leave of absence in certain circumstances. You should notify the Owner in writing as soon as you become aware that you may need a leave of absence. The Company will consider your request in accordance with applicable law and the Company's leave policies. You will be notified whether your leave request is granted or denied. If you are granted leave, you must comply with the terms and conditions of the leave, including keeping in touch with the Owner during your leave, and giving prompt notice if there is any change in your return date.

2. Family & Medical Leaves

Family and Medical Leave Act Policy

Eligible employees may take up to 12 workweeks of unpaid, job-protected leave under the Family and Medical Leave Act ("FMLA") in a 12-month period for specified family and medical reasons.

Employee Eligibility

To be eligible for FMLA leave, you must:

1. Have worked at least 12 months for the Company; and
2. Have worked at least 1,250 hours for the Company over the preceding 12 months

Conditions Triggering Leave

FMLA leave may be taken for the following reasons:

1. Birth of a child, or to care for a newly born child or placement of a child with the employee for adoption or foster care;
2. To care for an immediate family member (spouse, child, or employee's parent) with a serious health condition; or
3. Because of the employee's serious health condition which makes the employee unable to perform the functions of the employee's job.

Duration of Leave

Eligible employees may receive up to 12 workweeks of unpaid leave during any "rolling" 12- month period, measured backward from the date of any FMLA leave. FMLA leave for the birth or placement of a child for adoption or foster care must be concluded within 12 months of the birth or placement.

You may take FMLA leave intermittently, or by reducing your normal weekly or daily work schedule, when medically necessary for your own or immediate family member's serious health condition. Intermittent leave is not permitted for birth of a child, to care for a newly born child or for placement of a child for adoption or foster care. Employees who require intermittent leave or reduced-schedule leave must try to schedule their leave so that it will not disrupt the Company's operations.

Benefits during Leave

Depending on the purpose of your leave request the Company will require you to use accrued paid leave, if available, concurrently with some or all of the FMLA leave. In addition, you will not be eligible to accrue seniority or benefits, including vacation and holidays, during any period of an FMLA leave.

Maintenance of Health Benefits

If you and/or your family participate in our group health plan, the Company will maintain coverage under the plan during your FMLA leave on the same terms as if you had continued to work. If applicable, you must make arrangements to pay your share of

health plan premiums while on leave. In some instances, the Company may recover premiums it paid to maintain health coverage or other benefits for an employee and family.

Job Restoration

Upon returning from FMLA leave, you will normally be restored to your original job or to an equivalent job with equivalent pay, benefits, and other employment terms and conditions.

3. Military Leave (Active and Reserve Service)

If eligible, leave without pay is provided to you when you enter the uniformed services, as defined by federal or state law. For example, the uniformed services include military services with the Armed Forces of the United States or the Armed Forces Reserves. You may be entitled to reemployment rights and retention of full seniority benefits for all prior service upon reemployment under the Uniformed Services Employment and Reemployment Rights Act of 1994 and Florida law. You need to bring your military service orders to the Owner for review prior to commencement of the leave.

Temporary Employees may not be eligible for reinstatement following military leave, and reinstatement may not be required for other Employees in some circumstances. Contact the Owner for information pertinent to your situation.

As with other leaves of absence, failure to return to work or to reapply within applicable time limits may result in termination of employment.

VII. Termination

A. VOLUNTARY TERMINATIONS

If you decide to leave your employment with Pioneer Valley Extracts we ask that you give us at least two weeks written notice. This will give us the opportunity to make the necessary adjustments in our operation. You are required to return all property owned by the Company (e.g., vehicles, computers, keys, uniforms, identification badges, and credit cards) prior to your departure.

B. INVOLUNTARY TERMINATIONS

While the decision to commence employment is consensual, the same is not always true when the time comes to end the employment relationship. As an at-will employer, the Company reserves the right to end the employment relationship at any time, with or without cause or notice. In the event your employment is terminated, you are required to return all property owned by the Company to the Owner prior to your departure.

C. REDUCTIONS IN FORCE

While the Company hopes to continue growing and providing employment opportunities, business conditions, customer demand, and other factors are unpredictable. Changes or downturns in any of these or other areas could create a need to restructure or reduce the number of people employed. In light of these uncertainties, please be advised that it may become necessary to conduct layoffs at some point in the future.

In the event that the Company determines to lay off any Employee or a number of Employees, the Company retains full discretion to select, which Employee(s) will be laid off. While Pioneer Valley Extracts retains full discretion, some of the relevant factors might include the Company's operational requirements and the skill, productivity, ability, and past performance of those involved.

VIII. Supplemental Handbook policies

A. work hours

Working hours are from 8:00 am – 5:00 pm Monday - Friday. Periodically a person may be asked to start work earlier or work later than usual due to special job conditions or requirements.

B. meal periods

- staff have an unpaid meal. Usually one-hour, with start times varying between 11:00 a.m. and 1:00 p.m. depending on staffing levels and needs. No department or office should be left unattended during lunch breaks unless otherwise approved by a Manager.

C. REST Periods

Where state law mandates, full-time non-exempt employees are provided with rest periods. Unless there are regularly scheduled rest period times, the time should be taken at your discretion and to the extent possible, during the middle of your work period at an appropriate location. Since this time is counted and paid as time worked, you must not be absent from your workstations beyond the time allotted for the rest period time.

D. time and pay

Hourly employees are required to record and accurately allocate their time worked each day. Your Supervisor will inform you of the use of time clocks or timecards. At the end of the pay period, you must review and approve with your signature the times being submitted for pay. Some employees may be required to submit a timecard to their Supervisors for approval on a daily basis.

In the event of an error, it is important that you take your timecard to your Supervisor and have it corrected and initialed by you and your Supervisor. Corrections to timecards

should not be made by erasing or whiting out entries. Adjustments, if any, will be paid along with hours worked in the same pay period as management is made aware of the error.

The work week is Monday through Friday. Pay checks for the previous week's work are distributed each Friday. You may also have the option to have your pay directly deposited to your financial institution. If you are interested, contact your Office Manager/Administrator to obtain the Direct Deposit Authorization Form.

The company does not give advances in pay.

E. punctuality and absence

Your regular attendance on the job is necessary for the Company to meet its commitments. If you are late or miss work, you make it difficult for your department to work effectively.

If you must be late or miss work, you must notify your Supervisor AND the office as early as possible so that your job can be covered . You should make every effort to speak with your Supervisor before leaving a message on his cell phone or at the office. Failure to notify your Supervisor or office may result in disciplinary action.

Workers' compensation benefits

The Company complies with Federal and State regulations with regard to Workers' Compensation benefits. If you suffer an on-the-job injury or disease, you should **immediately** report it to your Supervisor. If you should suffer an on-the-job injury or disease you may be entitled to the following:

- Medical treatment with an employer-designated physician.
- Temporary disability indemnity payments for those periods of time in which you are unable to work due to the effects of the on-the-job injury or disease.
- Permanent disability indemnity, vocational rehabilitative services where appropriate and dependency benefits in cases of death.

For information about the benefits and claims administrator in your state, please contact your Office Manager/Administrator or the Corporate Insurance Department.

F. dress code

The Company requires that your dress, grooming and personal hygiene be appropriate to the work situation. This policy provides a general overview of acceptable attire .

Managers and Supervisors have the right to prescribe reasonable standards of dress and appearance for all employees. Standards are established to assure the safety of all employees to maintain the appearance of neatness and cleanliness of all employees

and conduct the daily business of the Company. You are required to wear appropriate attire at all times whether at the office, representing the Company at an industry event, or in the field. You must be dressed in a neat and professional manner. You may not wear suggestive attire, athletic clothing, shorts, T-shirts or hats. You will not be permitted to enter Company buildings without shirts or shoes. If you do not meet the standards of this policy you may be sent home. Non-exempt employee will not be compensated for any work time missed due to a failure to comply with this policy. The Company may provide specific guidelines of acceptable attire.

G. USE OF TECHNOLOGY AND THE INTERNET

The Company's technical resources--including desktop and portable computer systems, fax machines, Internet access, voice mail, and electronic mail (e-mail)--enable Employees quickly and efficiently to access and exchange information throughout the Company and around the world. When used properly, we believe these resources greatly enhance Employee productivity and knowledge. In many respects, these new tools are similar to other Company tools, such as stationery, file cabinets, photocopiers, and telephones. Because these technologies are both new and rapidly changing, it is important to explain how they fit within the Company and within your responsibilities as an Employee.

This policy applies to all technical resources that are owned or leased by the Company, that are used on or accessed from Company premises, or that are used on Company business. This policy also applies to all activities using any Company-paid accounts, subscriptions, or other technical services, such as Internet access, voice mail, and e-mail, whether or not the activities are conducted from Company premises.

NOTE: As you use the Company's technical resources, it is important to remember the nature of the information created and stored there. Because they seem informal, e-mail messages are sometimes offhand, like a conversation, and not as carefully thought out as a letter or memorandum. Like any other document, an e-mail message or other computer information can later be used to indicate what an Employee knew or felt. You should keep this in mind when creating e-mail messages and other documents. Even after you delete an e-mail message or close a computer session, it may still be recoverable and may even remain on the system.

1. Acceptable Uses

The Company's technical resources are provided for the benefit of the Company and its customers, vendors, and suppliers. These resources are provided for use in the pursuit of Company business and are to be reviewed, monitored, and used only in that pursuit.

Employees are not permitted to use the Company's technical resources for non-work purposes. Accordingly, Employees have no right of privacy as to any information or file maintained in or on the Company's property or transmitted or stored through the Company's computer, voice mail, e-mail, or telephone systems.

2. Unacceptable Uses

The Company's technical resources should not be used for personal gain or the advancement of individual views. Employees who wish to express personal opinions on the Internet are encouraged to obtain a personal account with a commercial Internet service provider and to access the Internet without using Company resources.

Solicitation for any non-Company business or activities using Company resources is strictly prohibited. Your use of the Company's technical resources must not interfere with your productivity, the productivity of any other Employee, or the operation of the Company's technical resources.

You should not send e-mail or other communications that either mask your identity or indicate that they were sent by someone else. You should never access any technical resources using another Employee's password. Similarly, you should only access the libraries, files, data, programs, and directories that are related to your work duties. Unauthorized review, duplication, dissemination, removal, installation, damage, or alteration of files, passwords, computer systems or programs, or other property of the Company, or improper use of information obtained by unauthorized means, is prohibited.

Sending, saving, or viewing offensive material is prohibited. Messages stored and/or transmitted by computer, voice mail, e-mail, or telephone systems must not contain content that may reasonably be considered offensive to any Employee. Offensive material includes, but is not limited to, sexual comments, jokes or images, racial slurs, gender-specific comments, or any comments, jokes or images that would offend someone on the basis of his or her race, color, religion, sex, age, national origin or ancestry, physical or mental disability, veteran status, marital status, possession of the sickle cell trait, religious creed, handicap, HIV-positive status, as well as any other category protected by federal, state, or local laws. Any use of the Internet to harass or discriminate is unlawful and strictly prohibited by the Company. Violators will be subject to discipline, up to and including discharge.

The Company does not consider conduct in violation of this policy to be within the course and scope of employment or the direct consequence of the discharge of one's duties. Accordingly, to the extent permitted by law, the Company reserves the right not to provide a defense or pay damages assessed against Employees for conduct in violation of this policy.

3. Access to Information

The Company asks you to keep in mind that when you are using the Company's computers you are creating Company documents using a Company asset. The Company respects the individual privacy of its Employees. However, that privacy does not extend to an Employee's work-related conduct or to the use of Company-provided technical resources or supplies.

Electronic information created and/or communicated by an Employee using Company tools, such as software, Internet access, voice mail, telephones, and e-mail, will generally not be monitored by the Company. Please keep in mind the following:

1. The Company monitors the performance, usage, and cost-effectiveness of its technical resources and periodically gathers information such as the number, frequency, time of day, and duration of calls or Internet site visits.
2. The Company may, in its discretion, review any Employee's electronic files and messages as well as the volume and content of usage.

Remember that your electronic communications and files are neither private nor confidential. They may be read by others within the Company and outside it without first obtaining your permission. If there is information that you do not want to be available to others, you should send that information in other ways.

4. Copyrighted Materials

You should not copy and distribute copyrighted material (e.g., software, database files, documentation, articles, graphics files, and downloaded information) through the e-mail system or by any other means unless you have confirmed in advance from appropriate sources that the Company has the right to copy or distribute the material. Failure to observe a copyright may result in disciplinary action by the Company as well as legal action by the copyright owner. Any questions concerning these rights should be directed to your Manager.

5. Confidential Information

E-mail and Internet/Web access are not entirely secure. Others outside the Company may also be able to monitor your e-mail and Internet/Web access. For example, Internet sites maintain logs of visits from users; these logs identify which company, and even which particular person, accessed the service. If your work using these resources requires a higher level of security, please ask your Manager or Management for guidance on securely exchanging e-mail or gathering information from sources such as the Internet or World Wide Web.

All Employees should safeguard the Company's confidential information, as well as that of customers and others, from disclosure. Do not access new voice mail or e-mail messages with others present. Messages containing confidential information should not be left visible while you are away from your work area.

E-mail messages containing confidential information should include the following statement, in all capital letters, at the top of the message: **CONFIDENTIAL: UNAUTHORIZED USE OR DISCLOSURE IS STRICTLY PROHIBITED.**

6. Security of Information

Although you may have passwords to access computer, voice mail, and e-mail systems, these technical resources belong to the Company, are to be accessible at all times by the Company, and are subject to inspections by the Company with or without notice. The Company may override any applicable passwords or codes to inspect, investigate, or search an Employee's files and messages. All passwords must be made available to Management upon request. You should not provide a password to other Employees or to anyone outside the Company and should never access any technical resources using another Employee's password.

In order to facilitate the Company's access to information on its technical resources, you may not encrypt or encode any voice mail or e-mail communication or any other files or data stored or exchanged on Company systems without the express prior written permission from Management and your Manager. As part of this approval, Management will indicate a procedure for you to deposit any password, encryption key or code, or software with Management so that the encrypted or encoded information can be accessed in your absence.

7. Software Policy

If you want to install software on Company computers, you must contact Management and request to have the software installed. Employees are prohibited from installing any software on any Company technical resource without the express prior written permission from Management.

Involving Management ensures that the Company can manage the software on Company systems, prevent the introduction of computer viruses, and meet its obligations under any applicable software licenses and copyright laws. Computer software is protected from unauthorized copying and use by federal and state law; unauthorized copying or use of computer software exposes the Company and the individual Employee to substantial fines and exposes the individual Employee to imprisonment. Therefore, Employees may not load personal software onto the Company's computer system and may not copy software from the Company for personal use.

8. Your Responsibilities

Each Employee is responsible for the content of all text, audio, or images that they place or send over the Company's technical resources. Employees may access only files or programs, whether computerized or not, that they have permission to enter.

Violations of any guidelines in this policy may result in disciplinary action up to and including termination. In addition, the Company may advise appropriate legal officials of any illegal violations.

H. cellular telephones

This policy outlines the use of personal cell phones at work. The personal use of business cell phones and the safe use of cell phones by employees while driving.

- **Personal Cellular Phones**

While at work, you are expected to exercise the same discretion in using personal cellular phones as is expected for the use of Company phones. Excessive personal calls during the workday, regardless of the phone used, can interfere with employee productivity and be distracting to others. You are asked to make personal calls on non-work time where possible and to ensure that friends and family members are aware of the Company's policy. Flexibility will be provided in circumstances demanding immediate attention.

- **Company Provided Cellular Phones**

Where job or business needs demand immediate access to an employee the Company may issue a business cell phone to you for work-related communications. To protect you from incurring a tax liability for the personal use of this equipment, such phones are to be used for business reasons only. Company Provided Cellular Phones are not to be used to stream music or videos on company time or that incur extraordinary data utilization. Data use greater than 3 gig per month will be charged back to the employee and deducted from pay.

When you are in possession of Company equipment such as cellular phones you are expected to protect the equipment from loss, damage or theft. Upon resignation or termination of employment, or at any time upon request, you may be asked to produce the phone for return or inspection. If you are unable to present the phone in good working condition within the time period requested (for example, 24 hours) you may be expected to be expected to bear the cost of a replacement.

If you separate from employment with outstanding debts for equipment loss or unauthorized charges you will be considered to have left employment on unsatisfactory terms and may be subject to legal action for recovery of the loss.

- **Safety Issue for Cellular Phone Use**

If your job responsibilities include regular or occasional driving and you are issued a cell phone for business use you are expected to refrain from using the phone while driving. Safety is a priority at all times. Regardless of the circumstances, including slow or stopped traffic, you are strongly encouraged to follow all safety procedures before placing or accepting a call, including the use of "hands free" equipment. When acceptance of a call is unavoidable, you are expected to keep the call short, use hands-free options if available refrain from discussion of complicated or emotional issues and keep your eyes on the road. If it is practical, you are encouraged to legally park somewhere to make or continue a telephone call while in your vehicle. Special care

should be taken in situations where there is traffic, inclement weather or in situations where the employee is driving in an unfamiliar area.

In situations where job responsibilities include regular driving and accepting of business calls, “hands free” equipment will be provided to facilitate the provisions of this policy. If your job responsibilities do not specifically include driving as an essential function, but you are issued a cell phone for business use, you are also expected to abide by the provisions above. Under no circumstances shall you place yourself at risk to fulfill business needs. Safety is a priority at all times and in all situations.

If you are charged with traffic violations resulting from the use of your phone while driving you will be solely responsible for all liabilities that result from such actions and you may be subject to disciplinary action.

- **Personal Phone Calls**

The Company discourages incoming and outgoing personal telephone calls. Please use discretion in making such personal telephone calls during working hours. If you must make outside phone calls, please keep them brief.

I. **company vehicles**

Company vehicles are used only by authorized employees on Company business

1. **Basic Policy**

Driver’s License – Only Employees with valid driver’s licenses and required driving record background clearances may drive Company vehicles. Driver’s licenses are verified annually through each state’s Department of Motor Vehicles. Although Company monitors employee driving records on an ongoing basis, employees should report changes immediately to the Company.

Traffic Accidents – If you are involved in an accident while operating Company-owned vehicles you should do the following:

- Report the accident to the branch office by phone as soon as possible
- Complete and submit an Accident Reporting Form to the branch office the day the accident occurs. Each vehicle has an “Accident Reporting Kit” containing report forms and instructions.
- Exchange insurance information with the parties involved. Do not exchange any other information including conclusions of fault.

Drug and alcohol testing may be required when you are involved in any work-related accident or injury. For further information about this Program consult the Drug and Alcohol Testing Policy.

Policy Title:	Quality Control and Testing Procedures	Page:	2 of 10
Policy Number:	Qual01	Effective Date:	9/15/18

Procedure:

- I. Testing Procedures:** Testing of PVx marijuana products will be performed by an Independent Testing Laboratory in compliance with the *Protocol for Sampling and Analysis of Finished Medical Marijuana Products and Marijuana-infused Products*, as amended in November, 2016, published by the DPH.
- PVx products will be testing according to a three (3) phase process:
 - **Phase 1 Testing**
 - Prior to processing a sample of the feed stock shall be sent to a 3rd party testing facility.
 - Testing will be done according to protocol below.
 - **Phase 2 Testing**
 - To be done after extraction by 3rd party Testing facility.
 - Testing will be done according to protocol below.
 - **Phase 3 Testing**
 - This test is to test the final product.
 - Testing will be done according to protocol below.
- II. Sampling and Testing Protocol:** Per regulation in Massachusetts, all PVx marijuana will be tested for the cannabinoid profile and contaminants. Marijuana products to be tested include, finished plant material (e.g. inflorescences or “buds”), cannabis resin, cannabis concentrates and various types of MIPs.

Because it is not possible to test all marijuana, we collect representative samples to provide to the analytical laboratory. Specifically, each marijuana production batch must be sampled and analyzed, and the samples collected for a production batch must be representative of all of the marijuana in the batch. The protocol provides the following definition of production batch:

Production Batch means a batch of finished plant material, cannabis resin, cannabis concentrate, or MIP made at the same time, using the same methods, equipment, and ingredients. You must assign and record a unique, sequential alphanumeric identifier to each production batch for the purpose of production tracking, product labeling, and product recalls. All production batches must be traceable to one or more marijuana cultivation batch(es).

- 1. Quality Control (QC) Samples** - Duplicate samples shall be collected to provide verification of sampling and laboratory procedures. Specifically, a duplicate should be collected for 5 percent (1 per 20) of the samples collected for each marijuana product type. Duplicate samples shall not be identified to the laboratory (this is considered blind quality control). Duplicate samples are used to evaluate any variance in the sampling and analysis procedures. To ensure authenticity, it should be noted that QC samples should be taken on the same day, be derived from the same batch and documented on the DPH test results tracking sheet.
- 2. Representative Sampling** - Specific procedures for collecting representative samples of marijuana production batches are likely to vary depending on several attributes of the products and production methods:

- Homogeneity – A sample is more likely to accurately represent the production batch if the material is homogenous (i.e., well mixed). Mixing or other homogenization steps help to homogenize the product before sample collection.
- Physical Form – Production batches will vary in physical form (e.g., liquids, solids), density, and viscosity. Physical form can affect homogeneity, homogenization steps, and sample collection methods. For example, liquid products can be homogenized by stirring.
- Grinding and other methods can be used to homogenize solid products.
- Quantity – Because production batches may vary in scale (i.e., volume or weight), varying numbers or sizes of samples may be required to promote representativeness.

3. Sample Collection Procedures - This section describes sample collection procedures that are generally applicable to any medical marijuana product including, but not limited to, finished plant material; liquid concentrates or MIPs; resins, waxes, creams, or other semi-solid products; or solid concentrates or MIPs.

- PVx will conduct sample collection in a manner that provides analytically sound and representative samples so that all marijuana products dispensed are safe, effective, and accurately labeled.
- PVx will document every sampling event and provide this documentation to the Department upon request.
- Prior to sample collection PVx will assemble all equipment and information needed before beginning. Items to assemble before sampling include, but are not limited to the following:
 - Logbook or sample collection forms;
 - Chain-of-custody forms (COCs);
 - Disposable gloves;
 - Decontaminated tool(s), such as a spatula, knife, sampling spear, or pipette;
 - Stainless steel bowl and implement to homogenize the product (e.g., by stirring, chopping, or grinding);
 - Clean, decontaminated surface for sample processing;
 - Sample containers appropriate for the analyses required;
 - Container labels and pen with indelible ink;
 - Supplies to thoroughly clean, decontaminated and dry sampling equipment between samples; and
 - A cooler with ice to keep samples cool until refrigeration or shipment to the laboratory.
- **Log Book and Forms:**
 - Sample collection personnel should create a new entry for each sampling event in a sample collection logbook or prepare sample collection forms for documentation of sample collection.

- Sample collection documentation should identify the sample collection date and start time, participating personnel, a general description of the product type and batch number sampled, a description of the sampling procedures used, and a record of batches that would potentially be impacted should analysis results indicate unacceptable contamination levels. Sample collection personnel shall identify or determine the cultivation batch number, production batch, and number of samples to be collected based on the guidance provided in Section 5, as well as further guidance obtained in consultation with the laboratory.
- The number of samples taken from each cultivation and/or production batch must be recorded in the sample collection logbook or forms. Record the sample cultivation and production batch identifiers (ID) for each sample.
- The batch IDs will be included on sample labels. In addition to the batch ID, create a unique sample ID for each sample. Sample identifiers should be unique for a given sample event. Record the batch and sample IDs in the sample collection logbook.
- Preparing sample labels and affixing them to sample containers immediately before sampling is recommended. Information to include on the label includes at a minimum the batch and sample IDs and date/time of collection and by whom. Additional information that must be recorded in documentation, if not on the label, includes sample collector's name, product type, collection method, and other details about the product, such as MIP type or production method.
- **Sample Collection Instructions:** Collect the planned samples from each cultivation or production batch one at a time. Follow these basic steps for each sample:
 - Wear disposable gloves to mitigate potential for contamination of samples.
 - Ensure that the sampling area is clean and decontaminated and lay out any tools and equipment needed.
 - Collect the sample using an appropriate tool. Do not touch the sample with your hands or allow the sample to touch anything that might cause cross contamination.
 - If necessary, place the sample in the stainless steel bowl or on a decontaminated cutting surface for homogenizing the sample using either the sample collection tool or separate clean, decontaminated implement.
 - Record the time each sample was collected and record any difficulties, inconsistencies with the sampling plan, or other remarks (e.g., environmental conditions) that might be relevant to data analysis or quality assurance.
 - To avoid cross contamination of samples, any tools or equipment that comes in contact with the finished plant material or other marijuana products should be cleaned before collecting the next sample.
 - All samples should be placed in clean, airtight sample containers that are large enough to hold the prescribed sample quantity with minimal headspace. Sample containers must be firmly closed and appropriately labeled.
 - To preserve the chemical and biological composition of the samples, they should be refrigerated or maintained on ice until shipped to the analytical laboratory.
 - Chain-of-custody paperwork should be completed immediately prior to shipment to the analytical laboratory.

- Storage and transportation of finished products shall be under conditions that will
 - protect them against physical, chemical, and microbial contamination as well as against
 - deterioration of finished products or their containers.
 - All vehicles and transportation equipment used in the transportation of marijuana
 - products or edibles requiring temperature control for safety must be designed,
 - maintained, and equipped as necessary to provide adequate temperature control to
 - prevent the marijuana products or edibles from becoming unsafe during transportation, consistent with applicable requirements pursuant to 21 CFR 1.908(c).
- Medical marijuana products and MIPs, especially solids or semi-solids such as finished plant material, may be heterogeneous with respect to distribution of cannabinoids or contaminants. To obtain a representative sample, liquid products should be thoroughly stirred or mixed before sampling. Solid and semi-solid products must be ground and thoroughly mixed. A grinding device that minimizes loss (e.g., leaching of resins) should be used, and the grinding device should be cleaned thoroughly after each use. Another method to promote the representativeness of a ground medical marijuana product is quartering. Quartering involves heaping the ground product, dividing the heap into four equal quarters, and selecting samples from two of the quarters, which are combined and mixed (Sexton and Ziskind, 2013). The remaining quarters may then be combined and mixed, then used for microbiological and contaminant testing (Sexton and Ziskind, 2013; Protocol for Sampling and Analysis of Finished Medical Marijuana Products and Marijuana-Infused Products for Massachusetts Registered Medical Marijuana Dispensaries (MMJ_PR_3.0_020516) 2/5/16 17) Resin and other solids should not be melted as a means of homogenization. Heating the product may alter the cannabinoid profile or contamination levels (WHO, 2005) thereby rendering the sample unrepresentative of the source product. Edible products tend to be relatively homogeneous (Sexton and Ziskind, 2013), so a selection of packaged or ready-to-dispense MIPs may be provided to the analytical laboratory to represent a given production batch (Sexton and Ziskind, 2013). MIPs may be either liquid or solid, and the solid MIPs may be of varying density (e.g., baked goods, candies, etc.). Laboratory samples of MIPs shall be homogenized prior to testing such that the sample is representative of the whole product. Homogenized samples should be mixed and quartered similar to the procedure described above. If production batches of individually packaged MIPs are sampled, multiple packaged products should be sampled such that they are representative of the production batch size.

4. **Sample Analysis:** All sample analyses described in this protocol shall be conducted by an independent laboratory that is licensed to test cannabis and either:
 1. Accredited to International Organization for Standardization (ISO) 17025 by a third party accrediting body such as A2LA or ACLASS, or
 2. Certified, registered, or accredited by an organization approved by the Massachusetts Department of Public Health. In addition to the regulatory qualifications and requirements referenced above, the independent laboratory should have a demonstrated ability to perform the specific analytical methods required and to provide defensible documentation and quality assurance.
5. **Record Keeping:** Test results shall be maintained for no less than one (1) year.
6. **Cannabinoid Profile Testing:**

- The optimal cannabinoid profile for marijuana has not been definitively determined, and this balance may differ depending on crop. Although many cannabinoids and related compounds are present in the cannabis plant, characterization of the cannabinoid profile should include, at a minimum, the dry-weight percentage of Δ^9 -tetrahydrocannabinol (Δ^9 -THC) and cannabidiol (CBD).
- Because target cannabinoid contents and ratios may vary depending on the desired dosage, medical condition, and other use considerations, minimum profile standards are not mandated. However, the cannabinoid profile must be included in product labeling as an aid to patients and caregivers. Analytical procedures for determining cannabinoid profiles are available in AHP (2013).

7. Heavy Metal Screen: Finished medical marijuana products must be tested for these four metals: Arsenic (As), Cadmium (Cd), Mercury (Hg), and Lead (Pb).

- Quantification of metals must be performed with a validated method such as those provided by USP (Chapter) or FDA (2011). A production batch of finished marijuana products (e.g., finished plant material, cannabis resin, or cannabis concentrate) may only be dispensed if all four of the metals are below the upper limits for the respective product and intended use specified (e.g., ingestion only or all other uses). These limits are in micrograms (μg) of contaminant per kilogram (kg) of product.

Metal	Upper Limit ($\mu\text{g/kg}$)
Arsenic (inorganic)	200
Cadmium	200
Lead	500
Mercury (total)	100

8. Pesticides Residues and Plant Growth Regulators:

- Non-organic pesticides may not be used to cultivate medical marijuana in Massachusetts. All production batches of finished plant material must be tested for residues of prohibited pesticides to include: Bifentate, Bifenthrin, Cyfluthrin, Etoxazole, Imazilil, Imidicloprid, Mycrobutanil, Spiromesofin, Trifloxystrobin
- Selection Criteria for Pesticide Residue Testing NOP 2611-1: Prohibited Pesticides for NOP Residue Testing NOP 2613: Responding to Results from Pesticide Residue Testing A further discussion of the application of this testing approach is available in USDA's 2010 - 2011 Pilot Study Pesticide Residue Testing of Organic Produce (USDA, 2012b). A production batch of finished plant material may be dispensed to patients or used to make other medical marijuana products if no individual pesticide or plant growth regulator is detected above 10 ppb. A laboratory that is unable to perform the required testing of pesticide residues at or below the 10 parts per billion (ppb) criteria may determine compliance by ensuring that any pesticide residues are present at a level less than or equal to 5 percent of the US EPA tolerance for the specific residue. EPA pesticide tolerances are available from Title 40 of the Code of Federal Regulations (CFR). In such circumstances, DPH should be notified regarding the specific pesticides to which this method is being applied.

9. Microbiological Contaminants and Mycotoxins Testing:

- Microbiologicals include: Yeast, mold, and bacteria, including E. coli and Salmonella,
- Mycotoxins include: aflatoxin B1, aflatoxin B2, aflatoxin G1, aflatoxin G2, and Ochratoxin A.
 - Requirements for total viable aerobic bacteria, total yeast and mold, total coliforms, and bile-tolerant gram-negative bacteria are given in colony forming unit (CFU) counts per mass of product sample. The requirement for pathogenic E. coli and Salmonella spp. is based on detection in a 1-gram sample, and the requirement for mycotoxins is based on the concentration per kilogram of sample. Analytical methods for enumerating and identifying specific microbiological contaminants must be consistent with the following United States Pharmacopeia (USP) chapters:
 - USP Chapter: Microbiological Examination of Nonsterile Products: Microbial Enumeration Tests. USP 36, Chapter
 - USP Chapter: Microbiological Examination of Nonsterile Products: Tests for specified Microorganisms. USP 36, Chapter Analytical methods for mycotoxins must be consistent with USP chapter

- Notify the Cannabis Control Commission within 72 hours of any laboratory testing results indicating that the contamination cannot be remediated and disposing of the production batch. The notification must be from both the Marijuana Establishment and the Independent Testing Laboratory, separately and directly. The notification from the must describe a proposed plan of action for both the destruction of the contaminated product and the assessment of the source of contamination.
- Notify the suppliers of the feedstock used in the contaminated sample.
