

## Energy Extension Request Form

### Instructions

This form is intended for use by Co-located Marijuana Operations, Marijuana Establishments, Craft Marijuana Cooperatives, and Microbusinesses licensed to cultivate marijuana (collectively, “Cultivation Facilities”) that are required to satisfy minimum energy efficiency and equipment standards pursuant to 935 CMR 500.120(11) effective July 1, 2020.

On March 23, 2018, the Cannabis Control Commission (“the Commission”) published regulations establishing energy efficiency requirements for new cultivation facilities, and requiring existing medical cultivation facilities applying for adult-use licensure to come into compliance by March 23, 2019. On November 1, 2019, the Commission published amended regulations allowing a co-located Marijuana Establishment and MTC with a final Certificate of Licensure before November 1, 2019 to extend the deadline for compliance from March 23, 2019 to January 1, 2020. The amended regulations also provided additional pathways for compliance and established the documentation requirements to demonstrate compliance. In January 2020, the Commission voted to further extend the deadline for compliance until July 1, 2020.

Cultivation Facilities possessing a final license issued prior to November 1, 2019 may choose to request an additional, one-time-only extension of six (6) months, until January 1, 2021, if the licensee agrees to file two Energy Extension Survey Reports.

**By requesting this Energy Extension, Cultivation Facilities agree to provide reports on energy and water usage, waste production, and other data using the Commission Energy Survey Report, and further, to install meters as necessary in order to monitor energy usage, water usage, and other data sought by the Energy Survey Report. Cultivation Facilities agree to complete and submit the Energy Survey Report twice within the six-month period: first, on or before October 1, 2020, followed by an updated report reflecting any changes on or before January 1, 2021.**

Cultivation Facilities seeking the Energy Extension must submit this form on or before July 1, 2020. This form must be filled out electronically and signed by an individual who has the authority to act on behalf of the Requesting Cultivation Facility. Cultivation Facilities should submit this form to their assigned Investigator or Compliance Officer.

## Requestor Information

1. Requesting Cultivation Facility name (*provide marijuana entity name and the name of the individual submitting this request on the entity's behalf*):

2. Requesting Cultivation Facility license number(s) that will be subject to this request, including the license type, tier level, and most recent issue date:

3. Requesting Cultivation Facility address(es), phone number, and email address:

4. Please describe how the Requesting Cultivation Facility currently tracks and monitors the water and energy usage necessitated by facility operations:

**By signing this document, I am requesting an extension of six (6) months of additional time to achieve operational compliance under 935 CMR 500.120(11). I affirm that I will satisfy minimum energy efficiency and equipment standards as of January 1, 2021. I further affirm that I will complete and submit the Cannabis Control Commission Energy Survey Report twice within the six-month period: first, on or before October 1, 2020, followed by an updated report on or before January 1, 2021. Further, I agree to install meters as necessary in order to provide the Cannabis Control Commission with energy and water usage and other data information sought by the Energy Survey Report.**
